

# **Building Codes Division**

## **Inspection Request Schedule Change**

### **What will change?**

Inspections may be scheduled for any day of the week, Monday through Friday, **prior to 7:00 AM**. (Excluding Holidays) The previous cut off time for requesting inspections was 7:30 AM. This change will occur to align our procedures with the new State of Oregon ePermitting process. **Inspection requests received after 7:00 AM will be scheduled for the next available work day.**

### **When will the change be effective?**

**January 2, 2020.**

### **What is the most efficient manner of requesting an inspection?**

The new State of Oregon ePermitting process is definitely the most efficient inspection request option available to you. You can request an inspection at any time with the new system on your computer, tablet, or even a text! The current Clatsop County inspection request line (503-338-3698) will eventually be phased out of use. Using the general business line (503-338-3697) for inspection requests is time consuming for both customers and staff alike as we are typically helping others at the counter, on the phone, or busy directing the daily work assignments.

If you have questions regarding the inspection request change please contact Building Official David Kloss for clarification.
