What is a strategic plan?

Strategic Plans are **important tools** that are built from **public input** and help people **understand the County's vision** and the **direction it is taking and why**.

Our Journey

Clatsop County began its year-long strategic planning process in January 2020.

This **collaborative effort** engaged elected officials, staff, stakeholder groups, and the general public and was conducted in partnership with the [Center for Public Service](#) at Portland State University. The result is the County's **new Strategic Plan**, adopted by the County Board of Commissioners in January 2021.
