

Clatsop County, Oregon
EMERGENCY OPERATIONS PLAN

April 2011

Prepared by:
Clatsop County Emergency Management Division
800 Exchange Street, Suite 400
Astoria, OR 97103
503-325-8645

This document was prepared under a grant from the Office of Grants and Training, United States Department of Homeland Security. Points of view or opinions expressed in this document are those of the authors and do not necessarily represent the official position or policies of the Office of Grants and Training or the U.S. Department of Homeland Security.

Preface

A wide range of laws, regulations, plans, and policies govern the Clatsop County Emergency Management Program. This program is administered by the Clatsop County Manager's Office and coordinated by the Emergency Management Division. The program receives its authority from the Oregon Revised Statutes, which are the basis for the Oregon Administrative Rules. The National Response Framework, the National Contingency Plan, and the State of Oregon Emergency Management Plan provide planning and policy guidance to counties and local entities. Collectively, these documents support the foundation for the Clatsop County Emergency Operations Plan.

This Emergency Operations Plan is an all-hazard plan describing how Clatsop County will organize and respond to events. It is based on, and is compatible with, the laws, regulations, plans, and policies listed above. The plan describes how various agencies and organizations in Clatsop County will coordinate resources and activities with other Federal, State, local, tribal, and private-sector partners.

It is recognized that response to emergency or disaster conditions to maximize the safety of the public and to minimize property damage is a primary responsibility of government. It is the goal of Clatsop County that responses to such conditions are conducted in the most organized, efficient, and effective manner possible. To aid in accomplishing this goal, Clatsop County has adopted, by resolution, the principles of the National Incident Management System and the Incident Command System. Clatsop County also maintains this Emergency Operations Plan with supporting plans/annexes and an Emergency Management Division to address response to major emergencies or disaster events.

Clatsop County public officials, departments, and employees that perform emergency and/or first response functions must be properly prepared. Department heads and elected officials shall, to the greatest extent possible, ensure that necessary training is provided to themselves and their employees to further prepare Clatsop County staff for successfully carrying out assigned emergency response roles.

**Letter of Promulgation
Clatsop County
Emergency Operations Plan**

To all Recipients:

Promulgated herewith is the revised Emergency Operations Plan for Clatsop County. This plan supersedes any previous Emergency Operations Plans. It provides a framework in which Clatsop County can plan and perform its respective emergency functions during a disaster or national emergency.

This Emergency Operations Plan attempts to be all-inclusive in combining the four phases of Emergency Management, which are (1) mitigation: activities that eliminate or reduce the probability of disaster; (2) preparedness: activities that governments, organizations, and individuals develop to save lives and minimize damage; (3) response: activities that prevent loss of lives and property and provide emergency assistance; and (4) recovery: short- and long-term activities that return all systems to normal or improved standards.

The Clatsop County Board of Commissioners has approved this plan. It will be revised and updated as required. All recipients are requested to advise the Emergency Manager of any changes that might result in its improvement or increase its usefulness. Plan changes will be transmitted to all addressees on the distribution list.

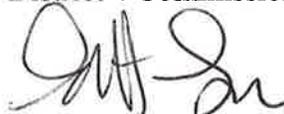

Dated this 13th Day of April, 2011

Dirk Rohne, Chairperson
District 4 Commissioner

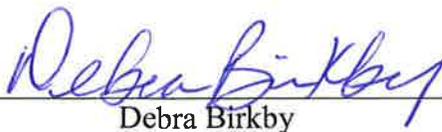

Peter Huhtala, Vice Chairperson
District 3 Commissioner

Scott Lee
District 1 Commissioner

Patricia Roberts
District 2 Commissioner

Debra Birkby
District 5 Commissioner

Plan Administration

Plan Distribution List

Copies of this plan have been provided to the following jurisdictions, agencies, and persons. Updates will be provided, when available. The recipient will have the responsibility for updating their respective Emergency Operations Plans when changes are received. The Clatsop County Emergency Manager is ultimately responsible for all plan updates.

Emergency Operations Plan Assignments

Unless otherwise stated, the following table identifies agencies responsible for the review and maintenance of specific plan sections and annexes. Changes will be forwarded to the Emergency Manager for revision and dissemination of the plan. This does not preclude other departments and agencies with a vital interest in the annex from providing input to the document; such input is, in fact, encouraged.

Section/Annex	Responsible Party
Basic Plan	Emergency Management Division
Emergency Support Function Annexes	
ESF 1 Transportation	Transportation and Development Department Emergency Management Division

Basic Plan

1.1 General

This Emergency Operations Plan (EOP) establishes guidance for Clatsop County's (County's) actions during response to, and short-term recovery from, major emergencies or disasters. It promulgates a framework within which the County will combine technical capabilities and resources with the sense, judgment, and expertise of its emergency response personnel, department directors, and other decision makers. Specifically, this EOP describes the roles and responsibilities of the County departments and personnel when an incident occurs, and it establishes high-level guidance that supports implementation of the National Incident Management System (NIMS), including adherence to the concepts and principles of the Incident Command System (ICS).

The County views emergency management planning as a continuous process that is linked closely with training and exercises to establish a comprehensive preparedness agenda and culture. The Emergency Manager will maintain the EOP through a program of continuous improvement, including ongoing involvement of County departments and of agencies and individuals with responsibilities and interests in this plan and supporting annexes.

1.2 Purpose

The Clatsop County Emergency Operations Plan (EOP) provides a framework for coordinated response and recovery activities during any type or size of emergency. The plan also provides specific information about direction and control, with guidance for all first responders and governmental agencies regarding strategic and tactical procedures supporting all phases of an emergency. This EOP complements the State Emergency Management Plan and the National Response Framework (NRF). It also identifies all Emergency Support Functions (ESFs) and critical tasks needed to support a wide range of response activities.

The objectives of this plan are to:

- Provide strategic and tactical procedures to support the primary responsibilities of Clatsop County during all phases of an emergency;
- Integrate multi-agency, regional, and, if applicable, tribal coordination into emergency operations by implementing NIMS, including ICS;
- Establish clear lines of authority and succession during any type of emergency;

1. Introduction

- Define roles and responsibilities spanning various departments, agencies, divisions, and management levels in support of critical functions;
- Outline clear guidelines and procedures for ensuring consistent and timely release of emergency public information; and
- Provide procedures and criteria for requesting and allocating essential resources to support overall emergency operations.

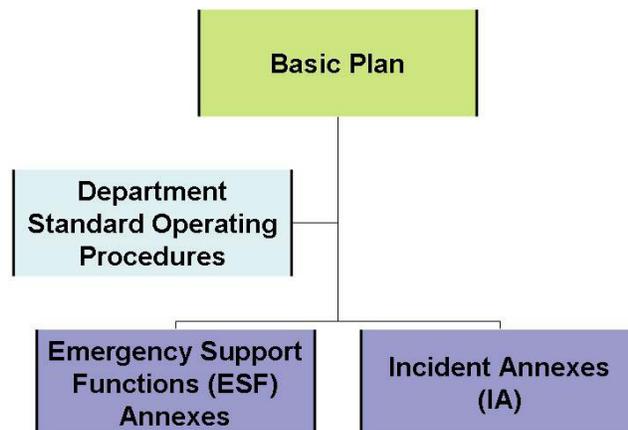

1.2 Scope and Applicability

This plan incorporates procedures supporting all facilities, operations, and personnel to be relied on during any type of emergency. The County EOP supports a program for emergency management consistent with and supplemental to the State of Oregon (State) Emergency Management Plan (EMP). In addition, it functions as a bridge between local, State, and Federal emergency management systems.

Organized as a Basic Plan, the County EOP describes roles, responsibilities, and concepts of operations, command, and control, while clearly defining escalation pathways and legal authorities involved with critical decision making and resource allocation by local and County governments.

The Basic Plan is supplemented by ESF Annexes and Incident Annexes (IA)s:

- ESF Annexes focus on critical operational functions and the positions responsible for carrying them out. These annexes clearly describe the policies, processes, roles, and responsibilities that agencies and departments carry out before, during, and after any emergency.
- IAs focus on the special planning needs generated by a particular hazard and contain unique and regulatory response details that apply to a single hazard.

1. Introduction

Additionally, IAs are included with the Basic Plan to provide tactical information and critical tasks unique to specific natural and human-caused/technological hazards that could pose a threat to Clatsop County. Incident types are based on the hazards identified in the most recent Hazard Definition/Hazard Analysis (December 2006) and Hazard Analysis Matrix (August 2002) conducted for the County.

Note: Resource shortages and civil disobedience are considered secondary risks during any emergency situation.

The intent of the Clatsop County EOP is to provide guidance and procedural information necessary to respond to any type of incident impacting a significant portion of the County. Individual communities and incorporated cities may maintain similar plans or procedures for implementation in response to localized incidents or initial activities prior to escalation to the County. If the County EOP is activated during an incident or countywide emergency declaration, cities and communities will adopt command and control structure and procedures representative of County response operations.

Procedures supporting NIMS implementation and training for the County have been developed and formalized by the Emergency Management Division (EMD). In addition, Continuity of Operations (COOP) and Continuity of Government (COG) Plans are under development for Clatsop County and, when combined with the County EOP, ESFs, and IAs, can be collectively referred to as a Comprehensive Emergency Management Plan for the County. Thus, each document lends a unique set of procedures and guidelines for supporting emergency preparedness, response, and recovery. A NIMS Implementation Plan has been formalized and adopted by the Clatsop County Board of County Commissioners (BOCC).

1.3 Relationship to Other Plans

1.3.1 National Incident Management System and the National Response Framework

Homeland Security Presidential Directive-5 (HSPD-5) directed the Secretary of Homeland Security to develop, submit for review by the Homeland Security Council, and administer, NIMS and NRF. NIMS, including ICS, enhances the management of emergency incidents by establishing a single comprehensive system and coordinated command structure to help facilitate a more efficient response among departments and agencies at all levels of government and, if necessary, spanning across jurisdictions.

The 15 ESFs of the NRF detail the missions, policies, structures, and responsibilities of Federal agencies, including the associated assistance a state is most likely to need. Each ESF has a primary agency assigned for maintaining and coordinating response activities. The State of Oregon EMP has also adopted the Federal ESF format. A summary of lead State and Federal agencies for each ESF

1. Introduction

can be found in Section 3 of this EOP. At a minimum, all emergency response personnel must be familiar with the NRF and have a working knowledge of the plans listed below.

1.3.2 State of Oregon Emergency Management Plan

The Oregon EMP is developed, revised, and published by the Director of Oregon Emergency Management (OEM) under the provisions of Oregon Revised Statutes (ORS) 401.270, which are designed to coordinate the activities of all public and private organizations that provide emergency services within this state and to provide for and staff a State Emergency Coordination Center (ECC) to aid the Governor. ORS 401.035 makes the Governor responsible for the emergency services system within the State of Oregon. The Director of OEM advises the Governor and coordinates the State's response to an emergency or disaster.

The Oregon EMP includes three volumes:

- Volume I: Preparedness and Mitigation includes plans and guidance necessary for State preparation to resist a disaster's effects. Sections include disaster hazard assessment, the Emergency Management Training and Exercise Program, and plans to mitigate (or lessen) a disaster's physical effects on citizens, the environment, and property.
- Volume II: Emergency Operations Plan, referred to as the Basic Plan, broadly describes how the State uses organization to respond to emergencies and disasters. It delineates the Emergency Management Division and includes a Hazard-Specific Plans and Procedures appendix. Volume II describes management functional areas common to most major emergencies or disasters, such as communications, public information, and others.
- Volume III: Relief and Recovery provides State guidance, processes, and rules for assisting Oregonians with recovery from a disaster's effects. It includes procedures for use by government, business, and citizens.

Activation and implementation of the Oregon EMP (or specific elements of the plan) may occur under various situations. The following criteria would result in activation of the EMP, including the EOP:

- The Oregon Emergency Response System (OERS) receives an alert from an official warning point or agency, indicating an impending or probable incident or emergency;
- The Governor issues a "State of Emergency" declaration;
- A Statewide disaster is imminent or occurring;

1. Introduction

- Terrorist activities or weapons of mass destruction (WMD) incidents are occurring or imminent;
- An alert, site emergency, or general emergency is declared at the Washington Hanford Nuclear Reservation in Washington State or at the research reactors at Oregon State University and/or Reed College;
- A community emergency occurs (or other appropriate Chemical Stockpile Emergency Preparedness Program Emergency Classification Level);
- A localized emergency escalates, adversely affecting a larger area or jurisdiction and exceeding local response capabilities;
- A geographically limited disaster requires closely coordinated response by more than one State agency; and/or
- An affected city or county fails to act.

1.3.3 Continuity of Operations and Government Plans

Clatsop County has not formalized a COOP or COG plan to date. However, once developed and implemented, these plans may be used in conjunction with the EOP during various emergency situations. The COOP and COG detail the processes for accomplishing administrative and operational functions during emergencies that may disrupt normal business activities. Part of these plans identifies essential functions of county and local government, private sector businesses, and community services and delineates procedures developed to support their continuation. County COOP/COG elements may include but are not limited to:

- Identification and prioritization of essential functions;
- Establishment of orders of succession for key positions;
- Establishment of delegations of authority for making policy determination and other decisions;
- Identification of alternate facilities, alternate uses for existing facilities, and, as appropriate, virtual office options, including telework;
- Development of interoperable communications systems;
- Protection of vital records needed to support essential functions;
- Management of human capital;

1. Introduction

- Development of a Test, Training, and Exercise Program for continuity situations;
- Devolution of Control planning; and
- Reconstitution and resumption of normal operations.

1.3.4 Natural Hazard Mitigation Plan

Since 2000, the Oregon Partnership for Disaster Resilience (OPDR) at the University of Oregon has been working with OEM, Federal Emergency Management Agency (FEMA) Region X, and local governments Statewide to coordinate the OPDR's activities in a manner consistent with FEMA's Interim Final Rule 44 Code of Federal Regulations (CFR) Part 201, published in February 2002, which requires states and communities to develop natural hazard mitigation plans to apply for FEMA Pre-Disaster Mitigation project funding and other hazard mitigation grant programs. The Clatsop County Hazard Mitigation Plan was updated and approved in 2008. Additional information on hazards and threats can be found in Section 2 of this EOP.

Clatsop County has also completed a Hazard Definition/Hazard Analysis (December 2006) and Hazard Analysis Matrix (August 2002).

1.3.5 City Emergency Operations Plans

A city's response to an emergency in its jurisdiction may be conducted from a local emergency center as designated by the Chief Executives of that city. In emergencies affecting multiple jurisdictions, the County EOC will be activated and communications established with each affected city to coordinate response. City representatives may be present in the County EOC.

The County EOC may be activated in response to single jurisdiction emergencies at the request of the affected city and on approval of County Emergency Management.

1.3.6 Agency and Organization-Specific Plans

A number of agency-specific plans and organizational procedures are available to support the County EOP and individual ESFs. These plans and procedures are interrelated and have a direct influence on the County's preparation prior to a major emergency or disaster, its activities in response to such an emergency or disaster, and its ability to successfully recover from such incidents or events. These plans also provide local, County, regional, and State agencies and entities with a consolidated framework for coordinating activities and resources, thus promoting efficient use of resources during all phases of emergency management.

1.4 Authorities

The following section highlights significant County and State regulations and plans governing activities for responding to major emergencies and disasters.

1. Introduction

Under the provisions of HSPD-5, the Secretary of Homeland Security is the principal Federal official for domestic incident management.

1.4.1 Legal Authorities

In the context of the County EOP, a disaster or major emergency is considered an incident requiring the coordinated response of all government levels to save the lives and protect the property of a large portion of the population.

As approved by the BOCC, the Emergency Management Division has been identified as the lead agency in Emergency Management in Clatsop County. The Director of Emergency Management has been appointed by the BOCC, and the Deputy Director has been given the title of Emergency Manager. The Director has authority and responsibility for the organization, administration, and operations of EMD, and the Deputy Director has the responsibility for day-to-day operations.

Table 1-1 sets forth the Federal, State, and local legal authorities upon which the organizational and operational concepts of this EOP are based.

Table 1-1 Legal Authorities
Federal

1.4.2 Mutual Aid and Intergovernmental Agreements

State law (ORS 401.480 and 401.490) authorizes local governments to enter into Cooperative Assistance Agreements with public and private agencies in accordance with their needs (e.g., the Omnibus Mutual Aid Agreement). Personnel, supplies, and services may be used by a requesting agency if the granting agency cooperates and extends such services. However, without a mutual aid pact, both parties must be aware that State statutes do not provide umbrella protection except in the case of fire suppression, pursuant to ORS 476 (the Oregon State Emergency Conflagration Act).

1. Introduction

Existing Mutual Aid Agreements and Memorandums of Understanding (MOUs) can be accessed through the Emergency Management Division. During an emergency situation, a local declaration may be necessary to activate these agreements and allocate appropriate resources.

1.5 Emergency Powers

1.5.1 Declaration of Emergency

The BOCC will issue an Emergency Declaration stating that an emergency exists and will specify a location or description of the affected area and jurisdictions included in the declaration. Under such conditions, this plan will be implemented. If possible, an Initial Damage Assessment (IDA) will be conducted by local jurisdictions and/or the County prior to requesting State or Federal assistance. Particular attention will be given to special needs populations to appropriately allocate resources necessary for providing critical services during an emergency.

OEM has set forth the following process necessary in declaring a local emergency:

- Describe the circumstances impacting an identified area;
- Identify the problems for which assistance is needed; and
- Clearly state what has been done locally to respond to the impact and needs.

When an emergency or disaster arises, and it is determined that conditions have progressed past the manpower, equipment, or other resource capabilities of the affected municipality or County department, a mayor or County department head will request that the following officials activate this EOP and the County EOC:

- County Manager
- Clatsop County Sheriff.
- Clatsop County Director and/or Deputy Director of Emergency Management

Under ORS 401, the Clatsop County BOCC has the legal authority to declare that a local emergency or disaster exists. Declaration of a local disaster enables the BOCC to invoke emergency authorities and to request additional resources from State or Federal government. (A sample Declaration is attached as Appendix A.)

If circumstances prohibit the timely action of the BOCC, the Chair of the BOCC may declare a state of emergency provided that the approval of a majority of the Board is sought and obtained at the first opportunity. Lines of succession are outlined in Section II, page 8.

1. Introduction

On such declaration, the County Manager or Director of Emergency Management or designee is empowered to assume centralized control of, and have authority over, all departments, divisions, and offices of the County. The state of emergency declared under the section shall specify the factors that warrant the declaration, the geographic boundaries of the emergency area, the special powers being invoked, and/or emergency controls to be imposed. The effective period for the declaration must also be specified (e.g., for 72 hours). The emergency period can be extended if emergency conditions still exist when the effective period expires.

ORS 401 specifies that the Governor may declare a state of emergency by proclamation at the request of a County governing body or after determining that an emergency has occurred or is imminent. Requests from the County must include:

- A description of the mission to be accomplished, the types of assistance needed, and a certification that all local resources have been expended; and
- A preliminary assessment of property damage or loss, injuries, and deaths.

When a city is impacted by a disaster and needs assistance beyond that provided by mutual aid agreements, the governing body of the city may declare emergency and request assistance from the County. Any such request will include the information shown above. If the County is unable to provide the assistance requested, it may declare a local emergency and request that the Governor declare an emergency.

Under ORS 401, cities must submit requests through the governing body of the county in which the majority of the city's property is located.

1. Introduction

1.5.2 Resource Request and Allocation

Refer to ESF 7 for more detailed information on available resources and coordination procedures established for the County. Resource requests and emergency/disaster declarations must be submitted from the County Emergency Manager to the Director of OEM according to the provisions outlined under ORS Chapter 401.

The executives of Clatsop County's incorporated cities are responsible for the direction and control of their communities' resources during emergencies. Each city's executive is responsible for requesting the additional resources required for emergency operations. All assistance requests are to be made through Clatsop County Emergency Management via the County EOC. County Emergency Management processes subsequent assistance requests to the State.

In the case of emergencies involving fires threatening life and structures, the Conflagration Act (ORS 476.510 to 476.610 and 476.990) can be invoked by the Governor through the Office of State Fire Marshall. This act allows the State Fire Marshall to mobilize and fund fire resources throughout the State during emergency situations. The local Fire Chief and County Fire Defense Chief assess the status of the incident(s) and, after determining that all criteria have been met for invoking the Conflagration Act, notify the State Fire Marshal via OERS. The State Fire Marshal reviews the information and notifies the Governor, who authorizes activation of the Act.

Resource Typing

Resource typing is a method for standardizing nomenclature, used when requesting equipment and managing resources during an incident; NIMS approves this method for ordering supplies and providing mutual aid to partners during an emergency.

Within many of the resource types are divisions for size, power, or quantity. These are commonly listed as Type I, Type II, Type III, and so on. If interpreted properly, a resource typing list can increase the usefulness of the tools requested in an emergency and may reduce costs by eliminating orders for equipment inaccurate or inappropriate for the situation. Response personnel and support staff should practice using resource typing lists and become familiar with the standard terminology for commonly requested resources.

1.5.3 Lines of Succession

Table 1-3 provides the policy and operational lines of succession during an emergency for Clatsop County. For Emergency Policy and Governance, if three Commissioners are available, and if the Chair and Vice Chair are not available, the most Senior Board member would convene the Board. If only individual Board member are present and a quorum is not present then the individual board members may take action for the Board. and confirm the action(s) as soon as possible when the Board is next assembled. The same would be the case for actions of a policy nature taken by the County Manager and Assistant County Manager

1. Introduction

Emergency Operations	Emergency Policy and Governance
Clatsop County Director Emergency Management	Chair of the BOCC
Deputy Director Emergency Management	Vice-Chair of the BOCC
Director of Transportation and Development	A Commissioner (from any of the remaining three)
Chief Deputy, Clatsop County Sheriff's Office	County Manager
Emergency Management Coordinator	Assistant County Manager

Each County department is responsible for pre-identifying staffing patterns showing a line of succession in management's absence. All employees must be trained in the protocols and contingency plans required to maintain leadership within the department. Continuity of government and operations during an emergency through direction of department heads from the designated Point of Contact of the BOCC. Individual department heads within Clatsop County are responsible for developing and implementing COOP/COG plans to ensure continued delivery of vital services during an emergency.

1.6 Liability

Liability issues and potential concerns among government agencies, private entities, other response partners, and across jurisdictions are addressed in existing mutual aid agreements and other formal memoranda established for Clatsop County and its surrounding areas. Copies of these documents can be accessed through the County Emergency Manager. During an emergency situation, a local declaration may be necessary to activate these agreements and allocate appropriate resources.

1.7 Safety of Employees and Family

All department heads (or designees) are responsible for the safety of their employees. Employees should attempt to make contact with their supervisors and managers within the first 24 hours following an incident. 9-1-1 should not be utilized as a common communication mechanism unless it is reflective of a need for emergency assistance or resources. Agencies and departments with developed COOPs will establish alternate facilities and staff locations, as applicable. Notification procedures for employee duty assignments will follow required procedures established by each agency and department.

During biological incidents or public health emergencies such as influenza pandemics, maintaining a resilient workforce is essential to performing response activities required to protect the community and overall County from significant

1. Introduction

impacts to human lives and the economy. Thus, personnel should be provided with tools to protect themselves and their families while they provide health and medical services during a pandemic or other type of public health emergency. Currently, the County has not developed plans formally addressing the safety and protection of medical personnel and response staff during a biological incident and/or contagious outbreak. However, the Clatsop County Public Health Department maintains a Respiratory Control Policy and Procedure for all public health staff. Safety precautions and personal protective equipment decisions will be specific to the type of incident occurring and will require just-in-time training among the first responder community and other support staff to implement appropriate procedures.

If necessary, the Oregon Occupational Safety and Health Administration may provide assistance and guidance regarding worker safety and health issues. Information about emergency procedures and critical tasks involved in a biological emergency incident or disease outbreak is presented in ESF 8 and in the IAs of this EOP.

Processes in support of employees and their families during emergency situations or disasters will be further developed upon finalization of COOP/COG plans and other medical/health-related procedures.

1.8 Financial Management and Expense Tracking

Refer to ESFs 5 and 14 for additional information regarding financial management procedures to be used throughout the duration of an emergency or disaster.

Expenditure reports should be submitted to the BOCC and managed through the Central Services (Finance) and the County Manager to identify budgetary shortfalls. The Human Resources Director will support procurement issues related to personnel, both volunteer and paid. In addition, copies of expense records and all supporting documentation should be submitted for filing FEMA Public Assistance reimbursement requests.

2

Situation and Planning Assumptions

2.1 Situation

The County is exposed to many hazards, all of which have the potential to disrupt the community, cause damage, and create casualties. Possible natural hazards include droughts, floods, wildfires, and winter storms. There is also the threat of a war-related incident such as a nuclear, biochemical, or conventional attack. Other disaster situations could develop from hazardous material accidents, health-related incidents, conflagrations, major transportation accidents, or acts of terrorism.

2.1.1 Community Profile

Clatsop County is located in the northwestern corner of Oregon, approximately one and a half hours northwest of Portland. The State of Washington and Columbia River border the County to the north. The Pacific Ocean forms the border to the west. Of the five incorporated cities within the county, Cannon Beach, Gearhart, Seaside, and Warrenton are situated along the Pacific Ocean, and Astoria and Warrenton are located along the Columbia River.

Regional access to the area is provided by U.S. and State Highways 101, 202, and 53, extending north to south and U.S. Highways 30 and 26, running east to west within the County. Access to the County is also possible through the Clatsop County Airport, Seaside Regional Airport, and the numerous coastal ports. The Columbia River provides access to major international shipping operations.

According to the 2010 census estimates, approximately 37,039 people make up Clatsop County's population. In addition to this permanent population, the coastal communities enjoy a large tourist population. During peak tourist seasons, the population of each city is estimated to be up to seven times the permanent population size. Fort Stevens State Park, located west of the City of Warrenton, is the State's largest park and easily doubles the population of Warrenton.

A major disaster or emergency will cause environmental damage, injuries, property loss, and disruption of essential public services and could impact regional economic, physical, and social infrastructures. The extent of casualties and damage will reflect factors such as when the event occurs, how severe it is, weather conditions, population density, and the possible triggering of secondary

2. Situation and Assumptions

risks, such as fires and floods. Initial emergency response activities focus primarily on minimizing loss of life and property, and damage to critical infrastructure, including cultural and economic assets. Historically, these activities have been carried out by traditional first responders, such as fire services and law enforcement. Local governments develop, maintain, and implement Comprehensive Emergency Management Plans and associated training programs that address all hazards. Agency-specific procedures and protocols established for support functions and critical tasks will be implemented in conjunction with the County EOP, as needed or required.

A number of emergency situations can result in overwhelming the capabilities and resources of local governments and jurisdictions during response operations. Thus, it is imperative that this jurisdiction establish clear lines of authority, formalize resource request and allocation procedures, and activate contingency plans, including mutual aid agreements, to acquire additional regional, State, and Federal resources as needed.

2.1.2 Hazards and Threats

Clatsop County may be subject to the effects of natural and technological disasters, including, but not limited to:

- Weather emergencies such as floods, windstorms, drought, snow, ice, or tornado;
- Geologic emergencies such as earthquake, landslide, volcanic eruption, tsunami, or large-scale erosion or subsidence;
- Epidemiological emergencies such as the infection of humans, animals, or agricultural products;
- Fire and explosions relating to industrial, structural, forest and range, or transportation incidents;
- Transportation emergencies relating to incidents involving aircraft, rail systems, watercraft, motor vehicles, or pipelines;
- Hazardous materials emergencies involving explosives, gases, corrosives, flammable liquids and solids, oxidizers, poisons, or radioactive materials;
- Civil disturbance such as terrorism, sabotage, unlawful demonstrations, or riots;
- Utility emergencies involving failure or disruption of electrical, telephone, water, gas, fuel oil, sewer, or sanitation systems; and

2. Situation and Assumptions

- Nuclear emergencies involving any accidental or intentional detonation of a nuclear device or an incident resulting from the use or transportation of nuclear materials.

In addition to the situations noted above, Clatsop County is host to thousands of visitors on regular basis, estimated at up to 220,000. This could lead to emergency situations occurring without the introduction of any specific hazard and created solely by the mass of people, traffic, and impact on day-to-day emergency service delivery or community infrastructure.

The following sections describe in greater detail hazards and threats that could be experienced by Clatsop County.

2.1.2.1 Natural Disasters

- Weather emergencies may include floods, windstorms, drought, snow, ice, avalanche, or tornado. Unusual weather patterns may also cause dramatic crop disasters in the timber or fishing industries.
- Geologic emergencies may include earthquake, landslide, volcanic eruption, erosion, or subsidence.
- Epidemiological emergencies may include the infection of humans, animals, or agricultural products.
- The mouth of the Columbia River is notorious for its long history of shipwrecks. Bar pilots are required for ships crossing the bar due to this day-to-day hazard.

2.1.2.2 Human-caused Disaster

- Fire and explosion emergencies may include industrial, structural, forest and range, or transportation-related incidents.
- Transportation emergencies may include incidents involving aircraft, rail systems, watercraft, motor vehicles, or pipelines.
- Hazardous materials emergencies may include gases, explosives, corrosives, flammable liquids and solids, oxidizers, poisons, or radioactive materials involved in incidents at fixed sites or during transportation.
- Civil disturbance emergencies may include unlawful demonstrations, riots, acts of terrorism, or sabotage.
- Utility emergencies may include failure or disruption of electrical, telephone, water, gas, fuel oil, sewer, or sanitation systems.

2. Situation and Assumptions

- Nuclear emergencies may include the accidental or deliberate detonation of nuclear weapons or an incident involving the use or transportation of nuclear materials.

Clatsop County has completed a Hazard Definition/Hazard Analysis (December 2006) and Hazard Analysis Matrix (August 2002). Findings include the following:

2.1.2.2.1 Severe Weather Emergencies (excludes flooding)

Severe weather is considered to be violent wind or other disturbances of the atmosphere such as heavy rain, snow, or ice. These conditions may result in loss of life, property damage, crop damage, damage to homes and businesses, and/or power outages. Weather extremes with a history of occurrence in Clatsop County include ice storms, conditions producing heavy snowfall, extreme cold, and high winds coupled with high tides creating enormous tidal surges. Occurrences of severe weather in the County have been frequent enough to warrant concern.

2.1.2.2.2 Communication Failures

Historically, the County's population has experienced power outages to vital communications centers lasting several hours. Disruption to communication lines or hubs serving Clatsop County has resulted in significant impacts to emergency communications. This could be serious because some emergency services communications depend on commercial power and have no backup communications power. Implementation of emergency communications networks can be hampered by the initiating event, such as severe weather, that precludes the movement of amateur radio operators or repair personnel. Inability to communicate with the public during an emergency or disaster increases the scope of the problem.

2.1.2.2.3 Hazardous Materials Incident

This hazard involves an accidental release or spillage of materials that have a detrimental impact on life, the environment, and/or property. This occurrence may be associated with long-term contamination or toxicity to the affected area. A hazardous material incident is most commonly associated with a transportation accident (highway, rail, or waterway), but such an incident may also take place at a fixed facility. Clatsop County contains some sites where hazardous materials are manufactured or used, as well as areas where those materials are stored, such as distributor petroleum product tank farms. The seafood processing industry uses large quantities of anhydrous ammonia that could become a hazard in the event of a fire or a seismic event. Cargo ship traffic represents a potential incident of horrific proportions.

2. Situation and Assumptions

2.1.2.2.4 Tsunami/Earthquake

This hazard is created by tectonic movement within the earth's crust. This movement is manifested as localized ground shaking and/or soil liquefaction. After the initial seismic event, tremors or aftershocks can occur for an extended period of time, resulting in continuing structural damage. Recent evaluation of the earthquake potential in the Pacific Northwest indicates that the earthquake threat has been underestimated and that this area could experience a subduction zone earthquake measuring in excess of 9 on the Richter scale. Such an occurrence would cause great loss of life and devastation of public and private property and infrastructure.

Clatsop County, like most of Oregon, is at high and growing risk for significant earthquake activity. Concurrent with this earthquake activity is the danger of devastating tsunamis striking coastal communities within minutes of offshore earthquakes. The latest scientific information indicates that eleven large tsunami-producing earthquakes have occurred along the Cascadia Subduction Zone in the past 5,500 years. The quakes are believed to have taken place between 300 and roughly 5,400 years ago, with an average interval of about 510 years.

Historically, communities that have been struck with earthquakes and tsunamis suffer casualties at a ratio of ten tsunami deaths for every one death due to the earthquake. With this type of scenario, Seaside may represent a community with the highest potential for loss of life in the State. In the case of a Cascadia event, the movement in the fault line off the coast of Clatsop County will result in the generation of a series of devastating tsunamis that will strike coastal communities within 20–30 minutes. Because of this, the combined score of 400 might be closer to an actual hazard assessment than looking at each event as a separate hazard.

The Clatsop County coast faces tsunami threats from remote sources as well. Tsunamis generated by earthquakes occurring in Alaska or other parts of the Pacific can, and have, reached the Oregon coast. Following the 1964 Alaska earthquake, wave heights reached over 18 feet in Washington and 14 feet in Oregon. Four people were killed in Oregon resulting from this increased wave size.

2.1.2.2.5 Fire/Wildland Fire

This hazard involves uncontrolled burning in residential, commercial, industrial, rural, and unincorporated areas of structures or wild lands. Urban fire occurrences are common within the incorporated areas of the County. There is also a threat of wildland/urban interface fires from areas of property adjacent to urban centers such as the beach, Camp Rilea, or campgrounds. The areas of greatest concern are forested rural residential developments, with only one entrance/exit, and/or narrow roads. The timely evacuation of these areas is problematic and is compounded by restricted access for firefighting equipment, and limited or nonexistent water supplies sufficient for controlling a major fire.

2. Situation and Assumptions

2.1.2.2.6 Flood/Landslide

There are over 8,000 acres of lowlands in Clatsop County that depend on over 35 miles of dikes for flood control. Many of these dikes are in poor condition and are expensive to maintain and repair. A dike failure in 1982 caused almost \$200,000 in damage, and another failure in 2001 required a significant effort to make emergency repair to prevent significant losses. The most recent Federally declared disaster event in Clatsop County was due to flooding in 1996.

Most significant flooding incidents occur in the winter months, between November and February, when the County experiences the heaviest rainfall. Clatsop County has had many problems with landslides and is mentioned here, as the two events are regularly connected. Astoria, which is built on a hill, is the population center that is potentially most at risk of land sliding. In the early part of this century, certain portions of Astoria suffered from land sliding on a yearly basis. Other areas in the County, although not directly in danger, could be isolated as a result of land sliding. Currently, most landslide problems occur on the main highways in the County. This can be a serious problem due to the lack of alternate routes. Emergency responders could be cut off from isolated areas, and evacuation could be severely hampered.

2.1.2.2.7 Civil Disorder

Civil disorder is defined as any incident with the intent of disrupting a community to the degree that police intervention is required to maintain public safety. This hazard includes riot, protests, demonstrations, and strikes, as well as acts of terrorism. The community of Seaside is a destination for spring break revelers, and riots have occurred. Timber sales within the County have sparked organized protests and unlawful actions that required extensive planning and personnel time. It is a fact that the United States is at war against terrorism at a level it has never before experienced. Clatsop County has no less quantifiable risk than any other County within the State. The County also has some unique aspects that put it at higher risk; for example, on July 31, 2002 the Federal Bureau of Investigation's (FBI's) National Infrastructure Protection Center issued a warning of potential al-Qaeda threats to U.S. infrastructure for the first half of the month of August. The warning reads: "The United States Government has received information of undetermined reliability regarding potential terrorist plots during the first half of August against bridges and nuclear power stations. The means of attack may involve suicide-bombers and other methods of explosives delivery, including explosive laden ships." Although 4,000 ships pass down the Columbia River each year, this area does not enjoy the security measures offered to higher-profile ports. Clatsop County was also the focus of national and international media when the bicentennial of the Lewis and Clark was celebrated in the years 2003 through 2005.

2.1.2.2.8 Volcano

Experience has shown that the interval between the onset of an eruption (or significant precursory phenomena) and the violent climax of an eruption itself

2. Situation and Assumptions

may range from a few hours to several days, weeks, or months. On the other hand, the time required to put emergency protective measures into effect depends on the size of the area at hazard, the density of population and settlement, the degree of mobility of the population, the transportation and communication facilities available, and the general technological level of development.

In practice, it will usually be appropriate to plan for two types of action:

- Phased response to a gradually developing volcanic crisis, during which one may expect to have warning of potentially dangerous volcanic events at least 24 hours before they occur; and
- Immediate response to a situation. Clatsop County is fortunate not to lie in the immediate danger zone of an active volcano, but it did experience volcanic ash fallout from Mount St. Helens. Such an incident can cause problems with machinery or systems that utilize air intakes.

2.1.2.2.9 Dam Failure

While dam failure could occur as a freestanding event, it is anticipated to be a collateral event of any significant earthquake. Threats to lives will not likely result from the initial breaching of a dam, but rather from the subsequent shortage of potable water during the response and recovery phase.

2.1.2.2.10 Infestation

This is not anticipated to be a significant event affecting a large segment of the County's population; however, such an event would have major economic impacts if it were to occur.

2.1.3 Hazard Analysis

In the Hazard Analysis, each of the hazards and threats described above is scored using a formula that incorporates four independently weighted rating criteria (history, vulnerability, maximum threat, probability) and three levels of severity (low, moderate, and high). For each hazard, the score for a given rating criterion is determined by multiplying the criterion's severity rating by its weight factor. The four rating criteria scores for the hazard are then summed to provide a total risk score for that hazard. Note that while many hazards may occur together or as a consequence of others (e.g., dam failures cause flooding, and earthquakes may cause landslides), this analysis considers each discrete hazard as a singular event.

2. Situation and Assumptions

Hazard	Rating Criteria with Weight Factors				Total Score
	History ¹ (WF=2)	Vulnerability ² (WF=5)	Max Threat ³ (WF=10)	Probability ⁴ (WF=7)	
<i>Score for each rating criteria = Rating Factor (High = 10 points; Moderate = 5 points; Low = 1 point) X Weight Factor (WF)</i>					
Dam Failure	2	25	10	7	44
Civil Disorder	20	25	50	70	165
Communications Failure	20	50	100	70	240
Earthquake	10	50	100	35	195
Flood	20	25	50	70	165
Hazardous Materials (Fixed site)	20	25	100	70	215
Hazardous Materials (Transportation)	20	25	50	70	165
Landslide	20	25	10	70	125
Severe Weather	20	50	100	70	240
Tsunami	20	50	100	35	205
Volcano	2	50	100	7	159
Wildfire	20	25	50	70	165

Notes:

1. History addresses the record of previous major emergencies or disasters. Weight Factor is 2. Rating factors: high = 4 or more events in last 100 years; moderate = 3 events in last 100 years; low = 1 or 0 events in last 100 years.
2. Vulnerability addresses the percentage of population or property likely to be affected by a major emergency or disaster. Weight Factor is 5. Rating factors: high = more than 10% affected; moderate = 1%-10% affected; low = less than 1% affected.
3. Maximum Threat addresses the percentage of population or property that could be affected in a worst case incident. Weight Factor is 10. Rating factors: high = more than 25% could be affected; moderate = 5%-25% could be affected; low = less than 5% could be affected.
4. Probability addresses the likelihood of a future major emergency or disaster within a specified period of time. Weight Factor is 7. Rating factors: high = one incident within a 10-year period; moderate = one incident within a 50-year period; low = one incident within a 100-year period.

2.2 Assumptions

General assumptions incorporated in this EOP are listed below.

- All areas of the County are subject to the effects of a disaster.
- Essential County services will be maintained as long as conditions permit.
- A disaster occurrence will require prompt and effective emergency response and recovery operations by government agencies, volunteer organizations, and the private sector.
- Natural or human-caused emergencies may be of such magnitude and severity that State and Federal assistance is required; however, such support will be available only after all local resources have been utilized.

2. Situation and Assumptions

- The responsibility for the protection of private property rests primarily with the private property owner.

2. Situation and Assumptions

THIS PAGE LEFT BLANK INTENTIONALLY

3

Roles and Responsibilities

Local and County agencies and response partners may have various roles and responsibilities throughout an emergency's duration. Therefore, it is particularly important that the local command structure established to support response and recovery efforts maintains a significant amount of flexibility to expand and contract as the situation changes. Typical duties and roles may also vary depending on the severity of impacts, size of the incident(s), and availability of local resources. Thus, it is imperative to develop and maintain depth within the command structure and response community.

Clatsop County has developed a plan to implement NIMS and to assist with training and preparing essential response staff and supporting personnel to incorporate ICS/NIMS concepts in all facets of an emergency. Each agency and department is responsible for ensuring that critical staff are identified and trained at a level enabling effective execution of existing response plans, procedures, and policies. A training roster that highlights levels and types of training completed by response personnel and essential support staff for the County must be maintained by individual agencies, volunteer organizations, private companies, and other community partners.

3.1 County Government

The Clatsop County Policy Group is under the immediate operational direction and control of the Clatsop County Manager, who coordinates decision making with Clatsop County Emergency Management. County Emergency Management provides the nucleus for emergency operations by coordinating information and resources to support roles and responsibilities assigned by this plan. During any type of emergency, the following functions and tasks typically require coordination by the County government:

- Search and Rescue (SAR) (not including Urban Search and Rescue);
- Emergency medical treatment;
- Disaster reporting;
- Transportation of victims and displaced persons;
- Repair and recovery of essential community services; and

3. Roles and Responsibilities

- Dissemination and management of public information and emergency instructions.

Deputy Director/Emergency Manager assigned emergency responsibilities share the following common tasks:

- Assigning personnel to the local and/or County EOC;
- Notifying department personnel and implementing established call-down procedures to contact key stakeholders and essential staff;
- Establishing ICS;
- Providing training to key personnel and emergency response staff;
- Protecting vital records, materials, facilities, and services; and
- Providing information and instructions to personnel regarding self-protection and minimizing exposure resulting from particular hazards associated with the emergency.

3.2 Emergency Management Division

The Emergency Management Division for Clatsop County is outlined in ESF 5. All incident management will follow ICS and, when necessary, expand into NIMS.

The Clatsop County Emergency Manager will coordinate interdepartmental emergency operations and maintain ultimate responsibility for resolving conflicts regarding the application of limited resources to a variety of concurrent emergency situations. The preservation of human lives will take precedence over property protection for decisions involving resource allocation and prioritization. Responsibility for coordinating emergency activities with State, regional, tribal, and private partners resides with County Emergency Management and will be accomplished through established liaison roles within the incident or unified command structure.

The Emergency Manager is responsible for emergency management planning and operations for the area of the County lying outside the limits of the incorporated municipalities of the County. Pursuant to city charter or ordinance, the Mayor (or other designated official) of each incorporated municipality is responsible for emergency management planning and operations for that jurisdiction. (Those responsibilities may be shared with County Emergency Management under agreement.)

Most departments within the County have emergency functions in addition to their normal duties. Each department is responsible for developing and maintaining its own emergency management procedures. Specific responsibilities are outlined below as well as in individual annexes.

3. Roles and Responsibilities

The EMD for the County is divided into two general groups: the Executive Group and Emergency Response Agencies organized by function.

3.2.1 Policy Group

The Policy Group is referred to in this plan as a single body but in fact may have several components with representation from each local political jurisdiction within the emergency management program. Each group is responsible for the activities conducted within its respective jurisdiction. The members of the Policy Group include both elected and appointed executives with certain legal responsibilities. Key general responsibilities for those officials include:

- Establishing strong working relationships with local jurisdictional leaders and core private-sector organizations, voluntary agencies, and community partners;
- Leading and encouraging local leaders to focus on preparedness by participating in planning, training, and exercises;
- Supporting participation in local mitigation efforts within the jurisdiction and, as appropriate, with the private sector;
- Understanding and implementing laws and regulations that support emergency management and response;
- Ensuring that local emergency plans take into account the needs of:
 - The jurisdiction, including persons, property, and structures,
 - Individuals with special needs, including those with service animals, and
 - Individuals with household pets, and
- Encouraging residents to participate in volunteer organizations and training courses.

3.2.1.1 Board of Commissioners

The BOCC is primarily responsible for:

- Ensuring adequate emergency management program authorities, staffing, and funding;
- Ensuring that elected and appointed officials are briefed on emergency roles;
- Participating in review and promulgation of this plan;
- Providing policy decisions, as required, to enhance emergency operations, including:

3. Roles and Responsibilities

- a) Enacting provisions of County Emergency Ordinance,
 - b) Controlling use of vital resources, and
 - c) Authorizing unbudgeted expenditures; and
- Declaring County emergency and request assistance from higher authority, as required.

3.2.1.2 Clatsop County Manager

- Advise and assist the BOCC.
- Serve as liaison to Chief Executives of other affected jurisdictions within the County and neighboring jurisdictions.
- Ensure that departmental lines of succession are established.
- Supports the Director of Emergency Management in ensuring that the County EOC staff are designated and trained.
- Assist in review and revision of this Plan.
- Serve as Chief Financial Officer and authorize expenditures and spending.
- Continue fulfilling all County Charter duties and responsibilities.

3.2.1.3 Emergency Management Division

- Ensure compliance with local, State, and Federal regulations.
- Facilitate biannual review of this EOP.
- Serve as coordinator for ESF 5, Information and Planning.
- Facilitate training for EOC staff.
- Advise and assist the BOCC in performing emergency duties.
- Maintain capabilities and manage EOC functions to ensure effective operations.
- Coordinate emergency management activities on an interagency, interdepartmental, and intergovernmental basis.

3.2.1.4 Director, Clatsop County Emergency Management Division

- Serve as staff advisor to the BOCC on emergency matters;
- Serve as Incident Commander during major incidents unless these have been transferred to a more appropriate official.

3. Roles and Responsibilities

- Activate County EOC.
- Keep the governing body apprised of the County preparedness status and anticipated needs;
- Assist in situation reporting and damage assessment.

3.2.1.5 Deputy Director/Emergency Manager, Clatsop County Emergency Management Division

The County Emergency Manager has the day-to-day authority and responsibility for overseeing emergency management programs and activities. The Emergency Manager works with the Executive Group to ensure that there are unified objectives with regard to the County's emergency plans and activities, including coordinating all aspects of the County's capabilities.

The Emergency Manager coordinates all components of the local emergency management program, including assessing the availability and readiness of local resources most likely required during an incident and identifying and correcting any shortfalls.

In particular, the Emergency Manager is responsible for:

- Serve as staff advisor to the BOCC on emergency matters;
- Coordinate the planning and general preparedness activities of the government and maintenance of this EOP;
- Analyze the emergency skills required and arranging the training necessary to provide those skills;
- Ensure the operational capability of the County EOC;
- Activate the County EOC;
- Serve as day-to-day liaison between the County and State OEM;
- When necessary fill the role as Director of Emergency Management Division,

3.2.1.6 Emergency Services Coordinator

- Assist in coordinating the planning and general preparedness activities of the government and maintenance of this EOP;
- Assist in analyzing the emergency skills required and arranging the training necessary to provide those skills;
- Prepare and maintain a resource inventory;
- Assist in ensuring the operational capability of the County EOC;

3. Roles and Responsibilities

- Assist in activating the County EOC;
- Keep the Director and Deputy Director apprised of the County preparedness status and anticipated needs;
- Assist the Director and Deputy Director in day-to-day liaison between the County and State OEM;
- Maintain liaison with organized emergency volunteer groups and private sector partners;

3.2.1.7 County Department Heads

Department and agency heads collaborate with the Policy Group during development of local emergency plans and provide key response resources. County department and agency heads and their staffs develop, plan, and train to internal policies and procedures to meet response and recovery needs safely. They should also participate in interagency training and exercise to develop and maintain the necessary capabilities. Department and agency heads not assigned a specific function in this plan will be prepared to make their resources available for emergency duty at the direction of the Incident Commander.

3.2.2 Responsibilities by Organization

This group includes the services required for an effective emergency management program, of which response is a key element. These agencies include Fire Departments, Law Enforcement, Emergency Medical Services (EMS) agencies, and Public Health, Environmental Health, and Transportation and Development Departments. This section is organized by function, with the primary responsibility assigned to the appropriate County agency.

3.2.2.1 County Transportation and Development Department

- Coordinate County public works and engineering operations, including repair to roads, bridges, and public facilities; construction of temporary bridges or detours; clearance and disposal of debris from streets and roads; and demolition of unsafe structures.
- Coordinate collection and analysis of information related to damage to street systems, buildings, bridges, and other public structures.
- Coordinate the acquisition of equipment and operators to assist in traffic control and other emergency operations.
- Coordinate transportation of equipment, materials, and supplies required for emergency operations.
- Serve as the coordinator for ESF 1, Transportation ESF 3, Transportation and Public Works and Engineering; assist in review and revision of ESF 12, Energy.

3. Roles and Responsibilities

3.2.2.2 Public Health Department

- Coordinate the delivery of health and welfare services within the County.
- Provide for the organization, coordination, and direction of County medical and health services and resources.
- Assess health hazards caused by damage to sewer, water, food supplies, or other environmental systems and provide safety information as required.
- Serve as coordinator for ESF 8, Public Health and Medical Services; and ESF 6, Mass Care, Emergency Assistance, Housing, and Human Services.
- Assess disaster-related mental health needs and the delivery of mental health services available through public and private agencies.
- Assist in crisis counseling for emergency workers (CISM).
- Coordinate information, referral, and advocacy for delivery of essential human services available through public and private agencies, including food, shelter, fuel, clothing, transportation, financial assistance, victim registration, and inquiry. This position may include serving as Liaison within ICS, coordinating collaboration among human service agencies and collecting information relating to services.
- Assist in coordinating volunteer registration, identifying needs and linking volunteer resources, individuals, and organizations offering volunteer assistance.
- Coordinate emergency response to the population served through human service agencies. Provide assessment and emergency-related case management services, as required.
- Identify vulnerable elderly and disabled clients who may be affected by the emergency due to geographical location or physical need, and respond on an as-needed basis.
- Assist in the coordination of emergent volunteers and donations.

3.2.2.3 County Counsel

- Advise County officials on legal matters relating to emergency operations.
- Prepare ordinances, orders, and/or resolutions as necessary to ensure that Emergency Management Division operates on a sound legal basis.

3. Roles and Responsibilities

- Review emergency plans, procedures, and agreements to ensure compliance with legal requirements.

3.2.2.4 Human Resources

- Advise County officials regarding personnel policies and work rules relating to emergency work.
- Recruit emergency personnel and coordinate temporary reassignment of County personnel to assist in emergency operations.
- Coordinate with EMD and help facilitate emergency response training for County employees.
- Provide Risk Management Services for the County to ensure that emergency operations are conducted safely and in accordance with the law.

3.2.2.5 Emergency Management Division Communication Unit

- Serve as County warning point to ensure timely emergency warning and notification of emergency responders and public officials.
- Coordinate with other dispatch centers and the EOC to process requests for emergency services.
- Serve as Annex Coordinator for ESF 2, Communications and assist in review and revision of ESF 5, Emergency Management.

3.2.2.6 Assessment and Taxation

- Coordinate with the Transportation and Development Department to assess damage to real property.
- Document financial damage and, if applicable, work with State and Federal assessment teams to obtain disaster recovery funds.
- Assist in review and revision of damage assessment procedures contained in ESF 3, Public Works and Engineering.

3.2.2.7 Central Services

- Provide accounting procedures to document emergency expenditures.
- Provide for curtailment of normal fiscal procedures to facilitate emergency expenditures.
- Ensure fiscal conformity to financial requirements when State or Federal funds are involved.

3. Roles and Responsibilities

- Supervise emergency activities in the areas of purchasing and facility maintenance.
- Manage Geo-based Information Services to provide hazard, response, and recovery mapping.
- Coordinate data processing and computer capabilities for continued operations.
- Assist in the financial recovery of the County.

3.2.2.8 Clerk and Elections

- Identify and ensure protection of vital records.
- Supervise emergency activities in the areas of records management.

3.2.2.9 County Manager - Public and Government Relations

- Coordinate the collection and dissemination of emergency information to the public through the media.
- Activate internal information systems and ensure that employees are provided with emergency information.
- Provide information and serve as liaison to Congressional and Legislative elected officials and their representatives.
- Assist in providing emergency information and documentation of emergency impacts through use of cable television.
- Assist in review and revision of ESF 5, Emergency Management.

3.2.2.10 Juvenile Department

- Provide fair and just sanctions to juvenile offenders and protect the community from the criminal actions of juvenile offenders.
- Assist the Court in legal intervention for children who are at risk or whose parents or guardians are unable to provide for their physical and emotional well-being.
- Assist other agencies in developing a care program for at risk children.

3.2.2.11 District Attorney

- Work with courts and law enforcement agencies to determine emergency arrest or release policies.
- Ensure that legal requirements for due processes are met.

3. Roles and Responsibilities

- Establish guidelines for body recovery, identification, storage, and disposition.
- Assist in review and revision of ESF 8, Public Health and Medical Services and ESF 13, Public Safety and Security.

3.2.2.12 Circuit Court

- Provide for reconstituted or continued operations of the Court system to ensure public safety and guarantee the right to a speedy trial.

3.2.2.13 Clatsop County Sheriff

- Maintain law and order, traffic and crowd control, and security to vital facilities and supplies, and control access to hazardous or evacuated areas.
- Serve as the coordinator for ESF 13, Public Safety and Security, and assist in the review and revision of ESF 9, Search and Rescue and ESF 1, Transportation.
- Assist in dissemination of warning to the public and notification of essential emergency response personnel.
- Coordinate with neighboring jurisdictions to transfer prisoners.
- Designate and train staff to support emergency operations.
- Assist in situation reporting and damage assessment.

3.2.2.14 Clatsop County Fire Defense Board Chief

- Coordinate countywide fire service activities.
- Request State assistance during emergencies.
- Serve as, or designate, a fire service representative to report to the EOC to assist in direction and control of fire service operations.
- Ensure fire service response and coordinated use of fire resources for activities involving fire prevention and suppression, rescue of trapped persons, medical triage and treatment, situation assessment, hazardous materials handling, dissemination of warning, and public information.
- Assist in review and revision of the Clatsop County EOP and all annexes. Serve as coordinator for ESF 4, Firefighting and provide

3. Roles and Responsibilities

input into ESF 8, Public Health and Medical Services and ESF 9, Search and Rescue.

3.3 Local and Regional Response Partners

The County's emergency organization is supported by a number of outside organizations, including the incorporated cities, service organizations, and the private sector. A list of supporting local and regional agencies can be found in the individual ESF Annexes to this EOP.

Incorporated Cities

Incorporated cities within Clatsop County include Astoria, Cannon Beach, Gearhart, Seaside, and Warrenton. The executives of the incorporated cities within Clatsop County are responsible for the direction and control of their community resources during emergencies.

First Responder Agencies/Entities

Typically, the following agencies and entities maintain primary roles and responsibilities during an emergency situation impacting Clatsop County:

Emergency Management Divisions	
Clatsop County Emergency Management Division	State of Oregon Region 11 HazMat Team
Clatsop County Public Health Department	Ambulance Service
Astoria Communications Center (9-1-1)	Seaside Communications Center (9-1-1)

Law Enforcement Agencies	
Clatsop County Sheriff's Office	Cannon Beach Police Department
Astoria Police Department	Gearhart Police Department
Seaside Police Department	Warrenton Police Department
Oregon State Police	

Fire Enforcement Agencies	
Clatsop County Fire Defense Board	Astoria Fire Department
Elsie-Vinemapple Rural Fire Protection District	Cannon Beach Rural Fire Protection District
Hamlet Fire Department	Gearhart Fire Department
Knappa Svensen Burnside Rural Fire Protection District	John Day-Fernhill Rural Fire Protection District
Mist-Birkenfeld Rural Fire Protection District	Lewis and Clark Rural Fire Protection District

3. Roles and Responsibilities

Fire Enforcement Agencies	
Olney-Walluski Fire and Rescue	Nehalem Bay Rural Fire Protection District
Seaside Fire and Rescue	Oregon Department of Forestry
Westport Wauna Rural Fire Protection District	Warrenton Fire Department
Camp Rilea	USCG Sector Columbia River

Related Agencies	
Clatsop County Transportation and Development	Sunset Empire Transportation
Cities of Astoria, Cannon Beach, Gearhart, Seaside, Warrenton, Public Works	Oregon Department of Transportation
Clatsop Board of County Commissioners	Clatsop County VOAD
Volunteer services and faith-based organizations	School districts
Red Cross, Salvation Army, and etc.	Financial services
Media partners and public information network	Private sector partners, including: railroads, energy/utility companies, and environmental clean-up contractors

3.4 State Response Partners

Under the provisions of ORS 401.055 through 401.155, the Governor has broad responsibilities for the direction and control of all emergency activities in a State-declared emergency. The administrator of OEM is delegated authority by ORS 401.260 to 401.280 to coordinate all activities and organizations for emergency management within the State and to coordinate in emergency matters with other states and the Federal government.

Under the direction and control of department heads, agencies of State government represent the State emergency operations organization. Responsibility for conducting emergency support functions is assigned by the Governor to the department best suited to carry out each function applicable to the emergency situation. Some State agencies may call upon their Federal counterparts to provide additional support and resources following established procedures and policies for each agency. Table 3-1 presents the State agencies assigned to each ESF by the State EMP that will help coordinate assistance to Clatsop County in the event of a disaster.

3. Roles and Responsibilities**3.5 Federal Response Partners**

Federal response partners are typically requested by OEM in the event that State resources become limited or specialized services are needed. In most instances, Federal resources become available following a formal declaration of emergency by the Governor. Thus, procedures and policies for allocating and coordinating resources at the Federal level follow the Oregon EMP and, if necessary, the NRF.

3.6 Response Matrix

Table 3-1 provides a matrix, by ESF, of the local, State, and Federal primary organizations that the County may rely on in the event of an emergency.

3. Roles and Responsibilities

Table 3-1 Response Partners by ESF

ESF	Scope (Federal)	Primary County/Local Agencies	Primary State of Oregon Agency	Primary Federal Agency
ESF 1 Transportation	<ul style="list-style-type: none"> Aviation/airspace management and control Transportation safety Restoration and recovery of transportation infrastructure Movement restrictions Damage and impact assessment 	County Transportation and Development Department	Dept. of Transportation	Dept. of Transportation

4

Concept of Operations

4.1 General

Primary roles in initial emergency response will be played by first responders such as fire and police departments and may involve hospitals, local health departments, Regional Hazardous Materials (HazMat) Teams, and Oregon Department of Forestry Incident Management Teams as well. Typically, as the emergency situation evolves and the immediate response subsides, a transition period will occur during which emergency responders will hand responsibility for active coordination of the response to agencies or organizations involved with recovery operations. In all emergency situations and circumstances, saving and protecting human lives receive priority.

The basic concept of emergency operations centers on managing and using all available resources in the County for effectively responding to all types of emergencies. Local government has the primary responsibility for emergency management functions and for protecting life and property from the effects of hazardous events. This EOP should be used when County municipalities or emergency response agencies are reaching, or have exceeded, their abilities to respond to an emergency incident.

In accordance with County Ordinance, the County's Emergency Management agency shall operate under the direction of the designated Director of Emergency Management.

The Deputy Director/Emergency Manager manages the emergency management program.

All departments of the County, plus other agencies or individuals who may perform specialized emergency functions, shall be a part of the County's EMD and shall participate in emergency management activities, including mitigation, preparedness, response and recovery planning, training, and exercising.

If local resources are insufficient to respond to an emergency, State assistance may be requested. The County shall make such requests to OEM.

4. Concept of Operations

Responsibilities of the Emergency Manager include management and coordination of large-scale events, as well as identifying and obtaining additional assistance and resources for emergency response agencies from the State and/or Federal government through the County Emergency Management.

All involved County emergency services will implement individual EOPs, standard operating procedures (SOPs), and supporting processes for the County emergency operations. These include providing the County EMD with the following information throughout an incident's duration:

- Operational status;
- Readiness and availability of essential resources;
- Changing conditions and status of resources (personnel, equipment, facilities, supplies, etc.); and
- Significant concerns and issues dealing with potential or actual loss of life or property.

4.2 Phases of Emergency Management

This plan adheres to the emergency management principle of all-hazards planning, which is predicated on the fact that most responsibilities and functions performed during an emergency are not hazard-specific. It should be noted that this is an emergency operations plan rather than a comprehensive emergency management plan, as its emphasis is on incident management rather than program management. That said, this EOP impacts and is informed by activities conducted before and after any emergency operations take place; consequently, a brief description of the four phases of emergency management is provided below.

For purposes of implementing this Plan, activation of the County's emergency organization will be based on the evolution of an emergency through a series of "time phases." It is readily acknowledged that not all phases may be identifiable in an emergency occurrence (e.g., there may be no warning period or the recovery phase may not be required). Tasks assigned within a certain phase in this plan are not intended to be restrictive, but rather to provide guidance in outlining activities that may be required during the entire course of an emergency.

4.2.1 Warning Period

The period during which evaluation of all available information indicates that the impact of a serious emergency is highly likely or imminent is known as the warning period. This period may be formally initiated over a span of time in slower developing emergencies (e.g., flood, or an impending health crisis) or may not exist when the impact of the emergency occurs suddenly and without advance indication (e.g., earthquake). If not already done, the EOC should be activated during this phase if valid warning is issued. Tasks common to all emergency agencies during this period are listed below.

4. Concept of Operations

- Evaluate the most probable consequences and resource requirements, based on the nature of the threat.
- Coordinate with County Emergency Management and/or the EOC to disseminate emergency instructions or information to the public.
- Recall essential response personnel, if this can be done safely.
- Stage resources near the hazard area if the situation warrants and it can be done without further threat to resources.
- Send representatives to the EOC and activate the EOC and notify dispatch centers, as necessary.
- Initiate life saving measures (e.g., evacuation, or shelter in place) as resources allow.

4.2.2 Impact Period

The period during which a serious emergency is occurring is known as the Impact Period. Impact may occur suddenly and be of limited duration or may follow a period of predictable buildup (warning) and last for an extended period. Tasks common to all emergency agencies during this period are listed below.

- Take immediate protective measures for emergency personnel and resources.
- Provide damage information to Emergency Management or the EOC, if activated.
- Initiate response activities, as conditions allow.

4.2.3 Response Period

The period immediately following the impact of a serious emergency during which all resources are committed to the protection of life and property is known as the Response Period. The EOC will be activated, if this has not already been done.

Tasks common to all emergency agencies during this period are listed below.

- Communicate with field personnel, Departmental Control Points, and the EOC to determine the scope of the emergency.
- Conduct field operations to save lives and protect property. Request mutual aid assistance, if required.
- Dispatch personnel to hazard areas to conduct a cursory damage assessment.

4. Concept of Operations

- If the emergency is of great magnitude with mass casualties or threatened populations, contact the EOC to determine response priorities.
- Send a representative to the EOC to assist in situation assessment analysis and coordination of public information, if appropriate.
- Analyze resource needs, and request additional support from EOC, if needed.
- Initiate short-term recovery activities such as shelter, debris removal, and building safety inspections.
- Maintain accurate records of all costs associated with emergency response, including expenditures for personnel, supplies, and equipment.

4.2.4 Recovery Phase

The time phase following the response period, during which activities are undertaken to effect long-term repair or recovery, is known as the recovery phase. Tasks common to all emergency agencies during this period are listed below.

- Analyze long-term restoration/recovery options.
- Conduct detailed damage analysis.
- Document and report emergency-related expenditures to support request for financial assistance.
- Assist disseminating information related to Federal assistance programs.
- Effect long-term repairs, including demolition, reconstruction, etc.

Additionally, this plan is implemented within the context of a continuous stream of incidents, events, and occurrences, any of which may develop into an emergency. Maintaining situational awareness is essential to achieving a forward-leaning posture that facilitates rapid response. Situational awareness refers to the ongoing process of collecting, analyzing, and disseminating intelligence, information, and knowledge to allow organizations and individuals to anticipate requirements and to react quickly and effectively. Situational awareness comprises an interactive process of sharing and evaluating information from multiple sources, integrating communications and reporting activities and activities to forecast or predict incidents to detect and monitor threats and hazards. These activities are the basis for advice, alert and warning, intelligence- and information-sharing, technical assistance, consultations, notifications, and informed decision making at all interagency and intergovernmental levels, as well as on the part of the private sector and the public.

4. Concept of Operations

4.3 Levels of Response

Implementation of this plan, notification of Command Staff and agency administrators, and activation of the EOC shall be based on a determination of the severity of an incident. Considerations in determining the level of an emergency may include the population at risk, resource availability, anticipated length of operations, threat to property, concurrent or conflicting incidents, long-term effects, etc.

Determination of an emergency level in no way affects the legal requirement for a County declaration of an emergency required to access additional resources or to implement emergency powers.

4.3.1 Level 1 Incident

A Level 1 incident is an emergency incident that may be managed within the normal organization and procedures of emergency services agencies but may require specific notifications, the acquisition of unique resources as requested by the on-scene Incident Commander (IC), or may require coordination of specific activities to support the response. Level 1 emergency will not normally require implementation of this plan or activation of the County EMD.

4.3.2 Level 2 Incident

A Level 2 incident is one that has special or unusual characteristics requiring response by more than one agency or jurisdiction, the acquisition and use of specialized resources, support to other jurisdictions, or that is beyond the scope of available County resources. Level 2 emergencies may require partial implementation of this plan, local declaration of emergency to access State resources or to enact emergency authorities, or notification and support as requested by the on-scene IC.

Level 2 emergencies may be declared by the on-scene IC, the Sheriff, the County Fire Defense Board Chief, the Emergency Manager, the Director of Public Health, or any public safety official needing additional resources.

Level 2 emergencies may require activation of the EOC but most likely will not lead to a County declaration, depending on resource needs.

4.3.3 Level 3 Incident

A Level 3 incident is one that requires the coordinated response of all emergency resources at all levels of government to save lives and protect property during emergencies impacting a sizable portion of the County's population. Level 3 emergencies require implementation of this plan and may require declaration of an emergency to access resources to evacuate, shelter, or provide other lifesaving emergency services.

Level 3 emergencies may be declared by the IC, the Sheriff, the County Fire Defense Board Chief, the Emergency Management Director, or (Designee), the

4. Concept of Operations

Director of Public Health or any public safety official in coordination with the above. Level 3 emergencies will require activation of the County EOC and will likely result in a County emergency declaration, as described in Section 1.5.1, to access resources from higher authority.

4.3.4 Security Incident (Level 4 Emergency)

A hazardous materials incident classified as a security incident involves threatened or actual sabotage or demonstration of civil disobedience, which if carried out, may result in a release. These may include blockage of a shipment of hazardous materials or threatened or actual sabotage to the shipment.

A security incident will primarily involve the law enforcement community in taking whatever steps are required to avoid a threat to the population. State and Federal assistance will likely be required to abate the threat.

4.4 Response Priorities

Public resources will be deployed according to the following priorities:

1. Protection of life

- Responders

- At risk populations

- Public at large

2. Incident Stabilization

- Protection of response resources

- Isolation of the impacted area

- Containment (if possible) of the incident

3. Protection of Property

4.5 Incident Management

4.5.1 Activation

When an emergency situation arises and it is determined that the normal organization and functions of County government are insufficient to effectively meet response requirements, the Emergency Manager (or designee) will activate and implement all or part of this EOP. In addition, the Emergency Manager may partially or fully activate and staff the County EOC, based on an emergency's type, size, severity, and anticipated duration.

4. Concept of Operations

4.5.2 Initial Actions

Upon activation of all or part of this EOP, the Emergency Manager (or designee) will implement the following actions immediately.

- Alert threatened populations and initiate evacuation as necessary in accordance with ESF 2, Communications.
- Initiate emergency sheltering procedures with the American Red Cross and other community partners if evacuation procedures are activated. Refer to ESF 6, Mass Care, Emergency Services, Housing, and Human Services, for more detailed information and specific procedures associated with sheltering, mass care, and related human services.
- Instruct appropriate County emergency services to activate necessary resources.
- Assign radio frequencies and communications equipment, implement a communications plan, and confirm interoperability among EOC staff and response agencies. Refer to ESF 2, Communications and ESF 2-1, Amateur Radio Plan for more detailed information and specific procedures;
- When local resources will not meet the needs of local and County emergency operations, request the BOCC to prepare and submit a formal declaration of emergency to OEM. The official declaration may be preceded by a verbal statement. Refer to ESF 7, Logistics Management and Resource Support for more detailed information and specific procedures.
- Prepare to staff the County EOC on 12-hour shifts.

4.5.3 Communications, Notification and Warning

Traditional communication lines such as landline telephones, cellular phones, faxes, pagers, internet/e-mail, and radio will be used by the County response personnel throughout the duration of response activities. Specific information regarding the County's communications is provided in ESF 2, Communications.

A public warning and broadcast system has been established for the County to provide emergency information and instructions during a pending or actual emergency incident or disaster. The Emergency Manager shall provide the public with educational/instructional materials and presentations on subjects regarding safety practices and survival tactics for the first 72 hours of a disaster. ESF 2 provides detailed information on how these systems are accessed, managed, and operated throughout an emergency's duration. Emergency notification procedures are established among the response community, and call-down lists are updated and maintained through each individual agency. External partners can be activated and coordinated through the County EOC.

4. Concept of Operations

4.5.4 Direction and Control

Direction and control of County emergency operations will be via the Incident Command System and the Multi-Agency Coordination System as described in Section 5, Command and Control.

The County Emergency Management Division has the responsibility for maintaining the readiness of the EOC and identifying and training support staff. County departments will be requested to designate personnel who can be made available to be trained by County Emergency Management and to work in the EOC during a major disaster. Other departments may be requested to provide assistance in a major emergency.

4.6 Inter-jurisdictional Coordination

4.6.1 Incorporated Cities

- The Chief Executives of the incorporated cities within the County are responsible for the direction and control of their local resources during emergencies.
- The Chief Executives of the incorporated cities are responsible for requesting additional resources not covered under mutual aid for emergency operations. Such requests shall be directed to Clatsop County Emergency Management.
- Under ORS 401, each city may establish an emergency management agency and appoint an emergency program manager.
- Each city should notify the County of the individual responsible for emergency management activities in its jurisdiction.
- If a city's emergency resources are insufficient or the city fails to act, County response resources may be deployed, under the direction of the County, should emergency conditions exist that threaten residents of the city.

4.6.2 Private Sector

Disaster response by local government agencies may be augmented by business, industry, and volunteer organizations. The Emergency Manager will coordinate response efforts with the private sector, including providing assistance as appropriate. Schools, hospitals, assisted living facilities, and other institutional facilities are required by Federal, State, or local regulations to have disaster plans.

The Emergency Manager will work with voluntary organizations to provide certain services in emergency situations, typically through previously established agreements. In the preparedness context, essential training programs will be coordinated by the sponsoring agencies of such organizations as the American

4. Concept of Operations

Red Cross, Salvation Army, faith-based groups, amateur radio clubs, and Community Emergency Response Teams.

Finally, the Emergency Manager shall provide the public with educational and instructional materials and presentations on subjects regarding safety practices and survival tactics for the first 72 hours of a disaster.

4.6.3 State Government

- Under the provisions of ORS 401, the Governor has broad authority and responsibility for the direction and control of all emergency activities in a State-declared emergency.
- State assistance may be requested whether or not a local Emergency Declaration has been or will be made, provided that all appropriate local resources have been utilized.
- Requests for State assistance shall be made by the Chief Executives of the County in which the emergency exists. (If the emergency is the result of a major fire, The Clatsop County District Fire Defense Chief may make a request to the State Fire Marshal for immediate mobile support under the State Fire Mobilization Plan.)
- The Governor may request a Presidential Disaster Declaration once appropriate local and State emergency resources are depleted.

4.6.4 Federal Government

- The Governor shall make requests for Federal disaster assistance to the President.
- Federal assistance may be requested and some provisions of the Federal Response Plan implemented prior to a formal declaration of disaster.
- A Presidential Disaster Declaration makes available extensive disaster response and recovery assistance, including support to government, business, and individual citizens.

4.6.5 Support Agencies

- Volunteer disaster relief organizations, private institutions, and business and industry will be called upon to support the Countywide emergency organization.
- The County shall coordinate local use of voluntary disaster relief resources available on a County-wide basis.

4. Concept of Operations

- As a signatory to the Intergovernmental Agreement for Regional Emergency Management, Clatsop County will participate with other emergency management agencies in the surrounding area to address problems that could result from a region-wide emergency.

4.7 Transition to Recovery

4.7.1 Demobilization

As the emergency situation progresses and the immediate response subsides, a transition period will occur during which emergency responders will hand responsibility for active coordination of the response to agencies or organizations involved with short- and long-term recovery operations.

4.7.2 Recovery

Recovery comprises steps the County will take after an emergency to restore government function and community services to levels existing prior to the emergency. Recovery is both a short- and long-term process. Short-term operations seek to restore vital services to the community and provide for the basic needs of the public, such as bringing necessary lifeline systems (e.g., power, communication, water and sewage, disposal of solid and hazardous wastes, or removal of debris) to an acceptable standard while providing for basic human needs (e.g., food, clothing, and shelter). Once stability is achieved, the County can concentrate on long-term recovery efforts, which focus on restoring the community to a normal or improved state of affairs. The recovery period is also an opportune time to institute mitigation measures, particularly those related to the recent emergency. This is also the phase for reassessing applications, processes, and functions of all annexes of this disaster plan for deficiencies. Restoration to upgrade damaged areas is possible if it can be shown that extra repairs will mitigate or lessen the chances of, or damages caused by, similar disaster in the future. ESF 14, Long-Term Community Recovery, summarizes specific procedures and plans to support recovery, mitigation, and economic stabilization for the County following a disaster.

5

Command and Control

5.1 General

In Oregon, NIMS and ICS use is mandatory during an emergency incident. ICS is a documented system that has been successfully used in managing available resources at emergency operations. The system consists of procedures for controlling personnel, facilities, equipment, and communications during all phases of emergency response. Additional information regarding the Clatsop County EMD and command structure is presented in ESF 5 of this plan.

Emergency Management Succession

The line of succession within Clatsop County for authority during an emergency is designated for the following positions:

1. County Manager
2. Director of Emergency Management
3. Deputy Director of Emergency Management
4. Director of Transportation and Development
5. Sheriff's Office Chief Deputy
6. Emergency Services Coordinator
7. Sheriff's Office Sergeant (on duty)

5.2 Emergency Operations Centers

- During a large-scale emergency, the Clatsop County EOC has the ability to operate as a multi-agency coordination entity. The primary location for the County Warrior Hall, Camp Rilea, Warrenton.
- If necessary, alternate EOC facilities will be designated by the EOC Manager.
- If a biological incident occurs, including pandemic influenza, the Clatsop County Public Health Department may staff a Medical EOC. This center will be coordinated with the Clatsop County Public Health Department Operations Center and the Clatsop County EOC.

5. Command and Control

- Other agencies may activate and staff individual incident command facilities for various types of emergencies; however, the County EOC will serve as the central point for coordination of response operations, resource requests and tracking, public information, and overall incident management.

5.2.1 Local and Agency Operations Centers

Information regarding the Public Health Agency Operations Center (AOC) and Hospital Medical Operations Center is to be completed following establishment of facilities and operating procedures.

5.2.2 Activation Procedures

Activation procedures for the County EOC are determined at the discretion of the IC and depend on an incident's type and size.

5.2.3 Staffing and Shift Change Procedures

The County EOC will be staffed on 12-hour shifts, unless otherwise determined by the IC.

5.2.4 Security

No formal EOC Security Plan has been developed to date.

5.2.5 Staff Support Services

The County EOC is currently not equipped to provide full support services to EOC staff and other personnel. The IC will be responsible for escalating additional resource requests to provide support services to the County EOC, should the situation warrant.

5.3 Incident Command Posts and Field Operations

Incident command posts (ICPs) and other facilities may be established on scene or within close proximity of an incident to support tactical operations. In addition, an incident communications center is typically co-located with the ICP.

Depending on the incident type and agencies involved, mobile command posts may be activated and implemented on scene to provide additional resources and communication capabilities for the duration of response activities. The Clatsop County Sheriff's Office, in conjunction with the Emergency Management Division and SAR Team, has devised a concept for enhancing the ability to deploy emergency equipment. In the event of a disaster, emergency, or other situation where certain equipment is required, the Sheriff's Office will maintain Emergency Response Vehicles that will be available for deployment to any emergency response agency in Clatsop County. Deployments outside of Clatsop County will be considered on a case-by-case basis and within the provisions of any existing mutual aid agreements.

5. Command and Control

All tactical and strategic operations occurring at the incident(s) will be coordinated and communicated through the County EOC to track, manage, and allocate appropriate resources and personnel. Pre-designated facilities and staging areas may be identified and described in existing agency-specific emergency response plans and standard procedures. This information will be consulted and implemented accordingly, depending on the incident type and local/County agencies involved in the response. The lead agency designated for each ESF is responsible for updating, maintaining, and disseminating appropriate plans, procedures, and guidance prior to, during, and following an emergency incident.

5.4 Interoperable Communications

Traditional communication lines—such as landline telephones, cellular phones, faxes, pagers, internet/e-mail, radio, and satellite phones—are used and relied upon by County response personnel throughout the duration of response activities. Specific information regarding Clatsop County communications is found in the ESF 2 Annex of this plan.

The Clatsop County Communications Strategic Plan addresses the emergency communications needs of all first response agencies in the County. Once implemented in its entirety, the plan will provide the structure for interoperable communications throughout Clatsop County’s first response agencies.

5.5 Incident Command System

ICS is designed to begin developing from the time an incident occurs until the requirement for management and operations no longer exists. The ICS structure can be expanded or contracted depending on an incident’s changing conditions. It can be staffed and operated by qualified personnel from any emergency service agency and may involve personnel from a variety of disciplines. As such, the system can be utilized for any type or size of emergency, ranging from a minor incident involving a single unit to a major emergency involving several agencies and spanning numerous jurisdictions. ICS allows agencies to communicate using common terminology and operating procedures. It also allows for effective coordination and allocation of resources throughout an incident’s duration.

ICS organization is built around an IC and four general staff positions—Operations, Logistics, Planning, and Finance—that apply in a routine emergency, organizing for a major event, or managing a major response to a disaster. In small incidents, these general staff positions may be managed by the IC. Larger incidents must usually be set up as separate sections within the ICS organization, each section overseen by a general staff member (commonly referred to as a “Section Chief”) who reports directly to the IC. The Clatsop County EOC has established a command structure, supporting activation and operational procedures, and position checklists compliant with NIMS/ICS. This information is available through the Emergency Manager and is located at the EOC in hardcopy format. A typical ICS organizational chart for Clatsop County is presented in Figure 5-1.

5. Command and Control

Plain language will be used during a multi-jurisdictional emergency response occurring in Clatsop County and is essential to public safety, especially that of first responders and those affected by the incident. The use of common terminology enables area commanders, State and local EOC personnel, Federal operational coordinators, and responders to communicate clearly with each other and effectively coordinate response activities, regardless of an incident's size, scope, or complexity. The ability of responders from different jurisdictions and different disciplines to work together depends greatly on their ability to communicate with each other.

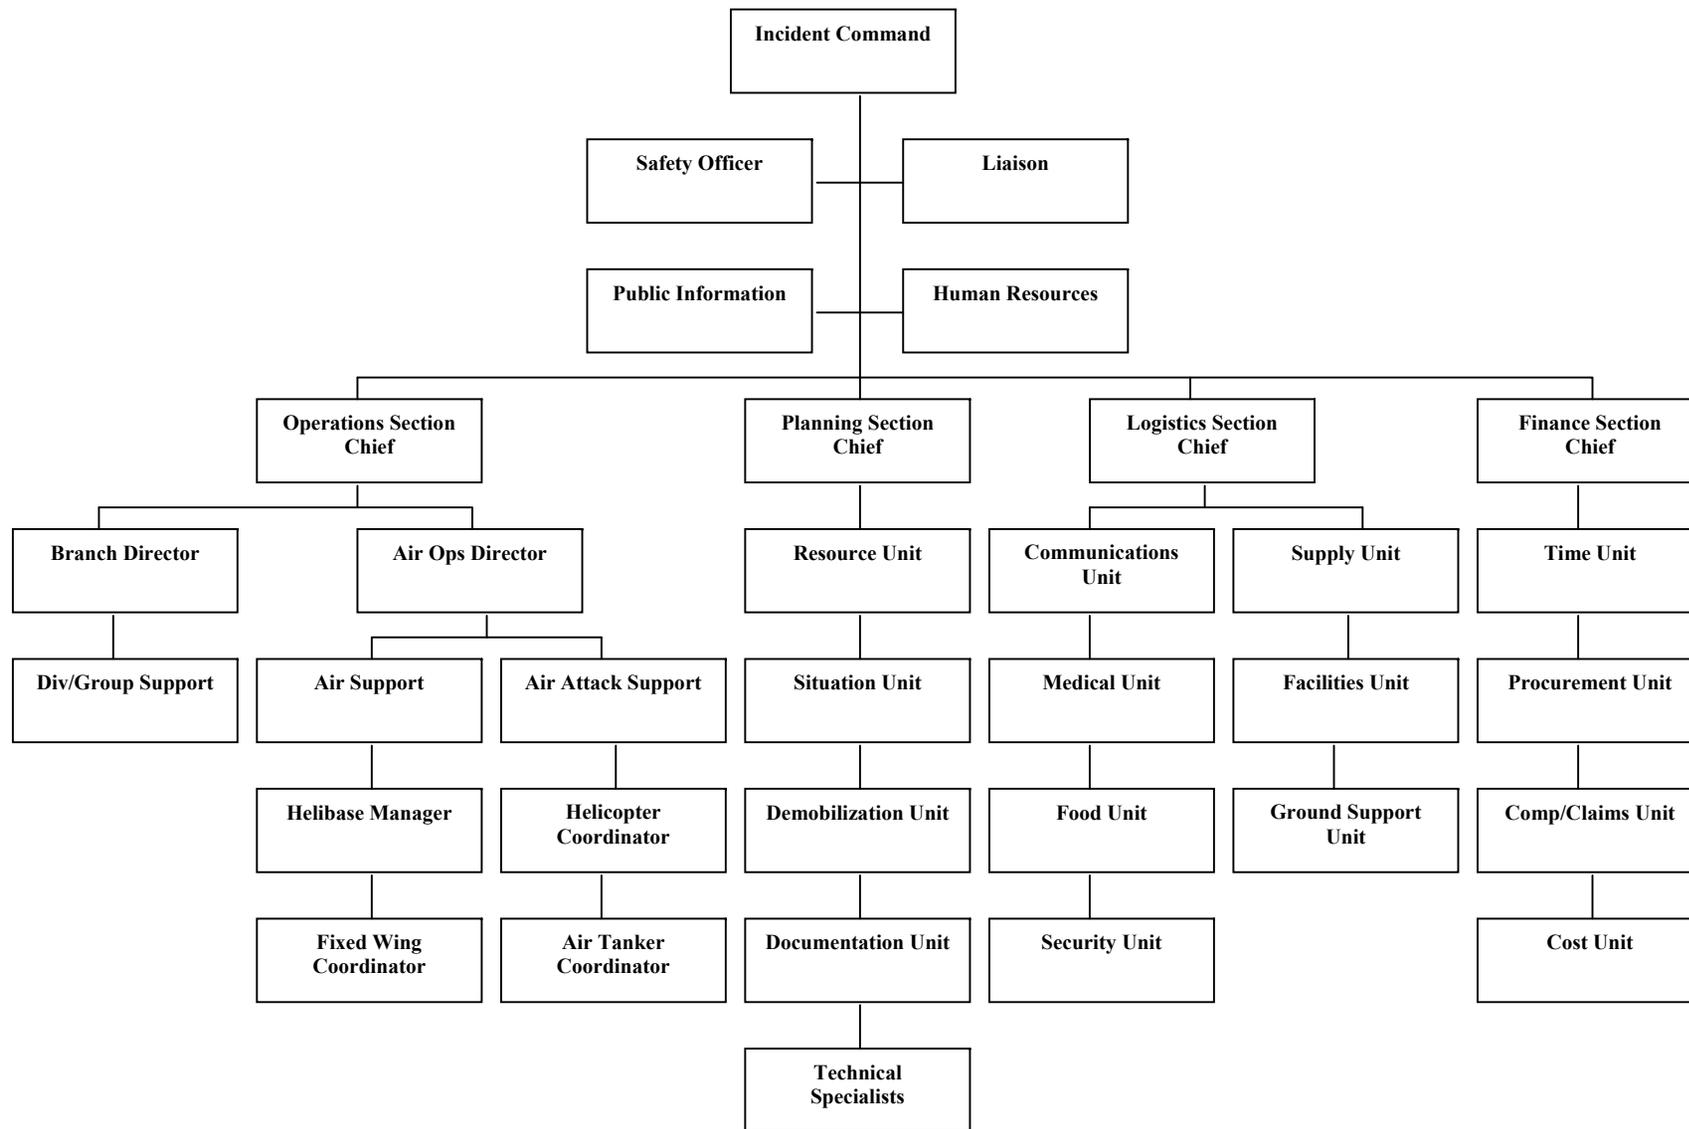

In certain instances, more than one ICS position may be managed by a single staff person due to limited personnel and resources available in the County. Thus, it is imperative that all primary and alternate EOC staff are trained on ICS functions other than those in their areas of expertise. Regularly exercising ICS, including sub-functions and liaison roles with volunteers and other support staff, will improve overall EOC operation efficiency and add depth to existing County emergency management and response organizations.

Current training and operational requirements set forth under NIMS were adopted and implemented by Clatsop County in January 2007. Training requirements apply to all first responders and disaster workers, including first-line supervisors, middle managers, and command and general staff.

NIMS identifies these positions as:

- Emergency medical service personnel,
- Firefighters,
- Hospital staff,
- Law enforcement personnel,
- Public health personnel,
- Public works/utility personnel,
- Skilled support personnel,
- Other emergency management response personnel, and
- Support, volunteer personnel at all levels.

Figure 5-1 Example of an Incident Command Structure for Clatsop County

5. Command and Control**5.5.1 Incident Commander**

In most cases, the initial IC will be the first responder managing the response. As the incident progresses to the recovery phase, a different agency representative or appointed official may transition into the IC role. Additional information about typical ICS assignments for Clatsop County regarding lead and support roles during emergency response is provided in the ESF Annexes as well as the IAs attached to this plan.

In general, the IC is responsible for all functions not assigned to one of the primary sections and for the following specific tasks:

- Determining incident objectives and strategies;
- Approving and supporting implementation of an Incident Action Plan (IAP);
- Coordinating all activities supporting the incident or event;
- Approving release of information through the Public Information Officer (PIO); and
- Performing the duties of the following command staff if no one is assigned to the position:
 - Safety Officer,
 - PIO, and
 - Liaison Officer.

5.5.2 Operations Chief

The Operations Chief position is typically filled by the lead agency managing response activities for a specific type of incident. The Operations section is typically organized into functional units representing agencies involved in tactical operations. Thus, typical agencies included in the Operations Section are:

- Fire (emergencies dealing with fire, earthquake with rescue, or HazMat);
- Law enforcement (incident(s) involving civil disorder/disturbance, significant security/public safety concerns, transportation-related accidents, and/or criminal investigations),
- Public health officials (contamination issues, disease outbreaks, and/or emergency incidents posing threats to human, animal, and environmental health), and

5. Command and Control

- Public works (incidents resulting in major utility disruptions, damage to critical infrastructure, and building collapse). Private entities, companies, and non-governmental organizations may also support the Operations section.

The Operations Chief is responsible for:

- Providing organizational support and directing implementation of unit operational plans and field response activities;
- Developing and coordinating tactical operations to carry out the IAP;
- Managing and coordinating various liaisons representing community response partners and stakeholders;
- Directing IAP tactical implementation; and
- Requesting resources needed to support the IAP.

5.5.3 Planning Chief

The Planning section is responsible for forecasting the future needs and events of the response effort while ensuring implementation of appropriate procedures and processes. This section is typically supported by four primary units: Resources, Situation, Documentation, and Demobilization. The Planning Chief is responsible for:

- Collecting, evaluating, and distributing information about the incident, and providing a status summary;
- Preparing and disseminating the IAP;
- Conducting planning meetings and developing alternatives for tactical operations; and
- Maintaining resource status.

5.5.4 Logistics Chief

The Logistics section is typically supported by the Supply, Food, Communications, Medical, Facilities, and Ground Support units. Depending on the incident's type and size, these units can be divided into two branches: Service and Support. The Logistics Chief is responsible for:

- Providing and managing resources to meet the needs of incident personnel;
- Managing various coordinators of particular resources, such as transportation-related equipment, EOC staff support services, supplies, facilities, and personnel;

5. Command and Control

- Estimating future support and resource requirements; and
- Assisting with development and preparation of the IAP.

5.5.5 Finance/Administration

The Finance/Administration section is specific to the incident type and severity of the resulting impacts. In some instances, agencies may not require assistance, or only a specific function of the section may be needed that can be staffed by a technical specialist in the Planning section. Potential units assigned to this section include Compensation/ Claims, Procurement, Cost, and Time. The Finance and Administration Chief is responsible for:

- Monitoring costs related to the incident;
- Maintaining accounting, procurement, and personnel time records; and
- Conducting cost analyses.

5.5.6 Other Command Staff Positions

Safety Officer

Safety Officers are generally responsible for:

- Identifying initial hazards and personal protective equipment requirements, and defining decontamination areas;
- Implementing site control measures;
- Monitoring and assessing the health and safety of response personnel and supporting staff (including EOC staff);
- Preparing and implementing a site Health and Safety Plan and updating the IC on safety issues or concerns as necessary; and
- Exercising emergency authority to prevent or stop unsafe acts.

Public Information Officer

A lead PIO will most likely coordinate and manage a larger public information network representing local, County, regional, and State agencies; tribal entities, political officials; and stakeholders. These duties include:

- Developing and coordinating release of information to incident personnel, media, and the general public;
- Coordinating information sharing among the public information network through the use of a Joint Information System (JIS) and, if applicable, establishing and staffing a Joint Information Center (JIC);

5. Command and Control

- Implementing information clearance processes with the IC; and
- Conducting and/or managing media briefings and implementing media-monitoring activities.

Liaison Officer

Specific liaison roles may be incorporated into the command structure established at the local and/or County EOC, depending on the type of emergency incident that has occurred. Liaisons represent entities and organizations such as hospitals, school districts, tribes, public works/utility companies, and volunteer services (American Red Cross). The following responsibilities are typically included in a liaison role:

- Serving as the contact point for local government officials, agency or tribal representatives, and stakeholders;
- Coordinating information and incident updates among interagency contacts, including the public information network; and
- Providing resource status updates and limitations among personnel, capabilities, equipment, and facilities to the IC, government officials, and stakeholders.

Table 5-1 ESF Assignments Within ICS

ESF	Title	Section
1	Transportation	Logistics
2	Communications	Operations
3	Public Works and Engineering	Operations
4	Firefighting	Operations
5	Emergency Management	Incident Command
6	Mass Care, Emergency Assistance, Housing and Human Services	Operations, Logistics, and Liaison
7	Logistics Management and Resource Support	All
8	Public Health and Medical Services	Operations and Liaison
9	Search and Rescue	Operations
10	Oil and Hazardous Materials Response	Operations
11	Agriculture and Natural Resources	Operations
12	Energy	Logistics
13	Public Safety and Security	Operations
14	Long Term Community Recovery	Administration/Finance and Planning
15	External Affairs	Incident Command and Liaison

The ESF annexes attached to this plan contain general guidelines for Clatsop County governmental entities, organizations, and County officials/departments to carry out responsibilities assigned at the County EOC or other designated facility where response efforts will be coordinated. The table below summarizes typical assignments for each ESF that may be necessary during an emergency incident.

5. Command and Control

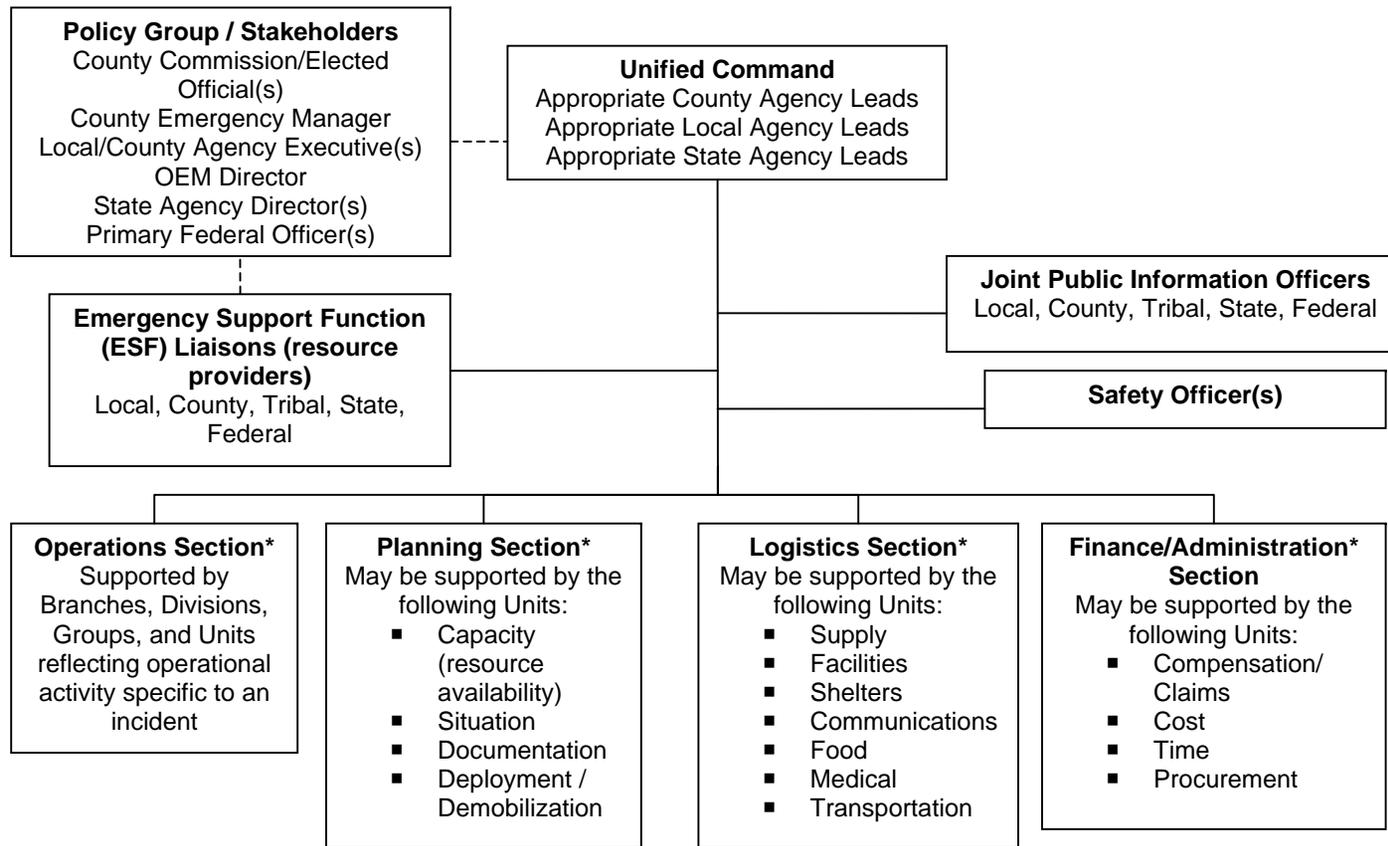

These assignments may be adopted for local and agency operations centers as well.

5.6 Unified Command

In some incidents, several organizations may share response authority. ICS has the advantage of combining different local, County, regional, State, and Federal agencies into the same organizational system, maximizing coordination of response activities and avoiding duplication of efforts. A structure called Unified Command (UC) allows the IC position to be shared among several agencies and organizations that maintain jurisdiction. UC members retain their original authority but work to resolve issues in a cooperative fashion to enable a more efficient response and recovery.

In a large incident involving multiple jurisdictions and/or regional, State, and Federal response partners, a UC may replace a single organization IC. Each of the four primary ICS sections may be further subdivided, as needed. In smaller situations, where additional persons are not required, the IC will directly manage all aspects of the incident organization. Figure 5-2 is an example of a unified command organizational chart for Clatsop County, providing operational flexibility to expand or contract staffing according to the incident's nature and size.

Figure 5-2 Example Unified Command Structure for Clatsop County

*Note: In any type of incident, a Section Chief may be assigned a Deputy. In addition, an Intelligence Section would be incorporated into the command structure in response to incidents of National Significance or those presumed or confirmed to be terrorist-related.

6. Plan Development, Maintenance and Implementation**6****Plan Development, Maintenance and Implementation****6.1 Plan Review and Maintenance**

At a minimum, this EOP will be formally reviewed and re-promulgated every five years to comply with State requirements. This review will be coordinated by the County Emergency Manager and will include participation by members from each of the departments assigned as lead agencies in this EOP and its supporting annexes. This review will:

- Verify contact information;
- Review the status of resources noted in the plan; and
- Evaluate the procedures outlined in this plan to ensure their continued viability.

In addition, lead agencies will review the annexes and appendices assigned to their respective departments. A more frequent schedule for plan review and revision may be necessary.

Recommended changes should be forwarded to:

Gene Strong, Deputy Director/Emergency Manager
Clatsop County Division of Emergency Management
800 Exchange Street, Suite 400 Astoria, OR 97103

6.2 Training Program

The County Emergency Manager specifically coordinates training for County personnel and encourages them to participate in trainings hosted by other jurisdictions throughout the region.

Current training and operational requirements set forth under NIMS have been adopted and implemented by the County. The Emergency Manager maintains records and lists of training received by County personnel. Training requirements apply to all first responders and disaster workers, including first-line supervisors, middle management, and command and general staff. NIMS identifies these positions as follows:

6. Plan Development, Maintenance and Implementation

- EMS personnel;
- Firefighters;
- Law enforcement personnel;
- Public works/utility personnel;
- Skilled support personnel;
- Other emergency management response personnel; and
- Support/volunteer personnel at all levels.

Table 6-1 provides the minimum training requirements for the County's emergency personnel.

Table 6-1 Minimum Training Requirements

Emergency Personnel	Training Required
Emergency Managers and Incident Commanders	ICS-100, -200, -300, -400 IS-700, -800, and as required by NIMS
Other Command Staff, Section Chiefs, and Deputy Section Chiefs	ICS-100, -200, -300 IS-700, and as required by NIMS
All other EOC personnel and first responders	ICS-100, -200 IS-700, and as required by NIMS
All other emergency response personnel, including volunteers	ICS-100 IS-700, and as required by NIMS
<i>Independent study courses can be found at http://training.fema.gov/IS/crslst.asp.</i>	

6.3 Exercise Program

The County will conduct exercises throughout the year to continually test and evaluate this EOP. Whenever feasible, the County will coordinate with neighboring jurisdictions and State and Federal government, to participate in joint exercises. These exercises will consist of a variety of tabletop exercises, drills, functional exercises, and full-scale exercises.

As appropriate, the County will use Homeland Security Exercise and Evaluation Program (HSEEP) procedures and tools to develop, conduct, and evaluate these exercises. Information on the HSEEP program can be found at <http://hseep.dhs.gov>.

The Emergency Manager will work with other County departments to identify and implement corrective actions and mitigation measures, based on exercises conducted through Emergency Management.

6. Plan Development, Maintenance and Implementation

6.4 Event Critique and After Action Reporting

In order to document and track lessons learned from exercises, the Emergency Manager will conduct a review, or “hot wash,” with exercise participants after each exercise. The Emergency Manager will also coordinate an After Action Report (AAR), which will describe the objectives of the exercise and document the results of the evaluation.

Similarly, reviews and AARs will be facilitated after an actual disaster that will document activities of the incident to improve the readiness of the County.

6.5 Community Outreach and Preparedness Education

Educational tools are used to teach the public about threats and disasters and what to do when an emergency occurs. The County maintains an active community preparedness program and recognizes that citizen preparedness and education are vital components of the County’s overall readiness.

Information about the County’s public education programs, hazard and mitigation information, and other emergency management and emergency services can be found on the County’s website: www.co.clatsop.or.us.

Appendix G. Acronyms and Glossary

Glossary of Key Terms

Actual Event: A disaster (natural or man-made) that has warranted action to protect life, property, environment, public health or safety. Natural disasters include earthquakes, hurricanes, tornadoes, floods, etc.; man-made (either intentional or accidental) incidents can include chemical spills, terrorist attacks, explosives, biological attacks, etc.

After Action Report: The After Action Report documents the performance of exercise related tasks and makes recommendations for improvements. The Improvement Plan outlines the actions that the exercising jurisdiction(s) plans to take to address recommendations contained in the After Action Report.

Agency: A division of government with a specific function offering a particular kind of assistance. In ICS, agencies are defined either as jurisdictional (having statutory responsibility for incident management) or as assisting or cooperating (providing resources or other assistance).

Agency Representative: A person assigned by a primary, assisting, or cooperating State, local, or tribal government agency or private entity that has been delegated authority to make decisions affecting that agency's or organization's participation in incident management activities following appropriate consultation with the leadership of that agency.

All Hazards: Any incident caused by terrorism, natural disasters, or any CBRNE accident. Such incidents require a multi-jurisdictional and multi-functional response and recovery effort.

Area Command (Unified Area Command): An organization established (1) to oversee the management of multiple incidents that are each being handled by an ICS organization or (2) to oversee the management of large or multiple incidents to which several Incident Management Teams have been assigned. Area Command has the responsibility to set overall strategy and priorities, allocate critical resources according to priorities, ensure that incidents are properly managed, and ensure that objectives are met and strategies followed. Area Command becomes Unified Area Command when incidents are multi-jurisdictional. Area Command may be established at an emergency operations center facility or at some location other than an incident command post.

Assessment: The evaluation and interpretation of measurements and other information to provide a basis for decision-making.

Assignments: Tasks given to resources to perform within a given operational period that are based on operational objectives defined in the IAP.

Assistant: Title for subordinates of principal Command Staff positions. The title indicates a level of technical capability, qualifications, and responsibility

Appendix G. Acronyms and Glossary

subordinate to the primary positions. Assistants may also be assigned to unit leaders.

Assisting Agency: An agency or organization providing personnel, services, or other resources to the agency with direct responsibility for incident management. See also Supporting Agency.

Audit: formal examination of an organization's or individual's accounts; a methodical examination and review.

Available Resources: Resources assigned to an incident, checked in, and available for a mission assignment, normally located in a Staging Area.

Branch: The organizational level having functional or geographical responsibility for major aspects of incident operations. A branch is organizationally situated between the section and the division or group in the Operations Section, and between the section and units in the Logistics Section. Branches are identified by the use of Roman numerals or by functional area.

Chain-of-Command: A series of command, control, executive, or management positions in hierarchical order of authority.

Check-In: The process through which resources first report to an incident. Check-in locations include the incident command post, Resources Unit, incident base, camps, staging areas, or directly on the site.

Chief: The ICS title for individuals responsible for management of functional sections: Operations, Planning, Logistics, Finance/Administration, and Intelligence (if established as a separate section).

Command: The act of directing, ordering, or controlling by virtue of explicit statutory, regulatory, or delegated authority.

Command Staff: In an incident management organization, the Command Staff consists of the Incident Command and the special staff positions of Public Information Officer, Safety Officer, Liaison Officer, and other positions as required, who report directly to the Incident Commander. They may have an assistant or assistants, as needed.

Common Operating Picture: A broad view of the overall situation as reflected by situation reports, aerial photography, and other information or intelligence.

Communications Unit: An organizational unit in the Logistics Section responsible for providing communication services at an incident or an EOC. A Communications Unit may also be a facility (e.g., a trailer or mobile van) used to support an Incident Communications Center.

Cooperating Agency: An agency supplying assistance other than direct operational or support functions or resources to the incident management effort.

Appendix G. Acronyms and Glossary

Coordinate: To advance systematically an analysis and exchange of information among principals who have or may have a need to know certain information to carry out specific incident management responsibilities.

Corrective Action: Improved procedures that are based on lessons learned from actual incidents or from training and exercises.

Corrective Action Plan: A process implemented after incidents or exercises to assess, investigate, and identify and implement appropriate solutions to prevent repeating problems encountered.

Critical Infrastructure: Systems and assets, whether physical or virtual, so vital to the United States that the incapacity or destruction of such systems and assets would have a debilitating impact on security, national economic security, national public health or safety, or any combination of those matters. (Department of Homeland Security, National Response Plan (December 2004), 64.)

Deputy: A fully qualified individual who, in the absence of a superior, can be delegated the authority to manage a functional operation or perform a specific task. In some cases, a deputy can act as relief for a superior and, therefore, must be fully qualified in the position. Deputies can be assigned to the Incident Commander, General Staff, and Branch Directors.

Dispatch: The ordered movement of a resource or resources to an assigned operational mission or an administrative move from one location to another.

Disciplines: A group of personnel with similar job roles and responsibilities. (e.g. law enforcement, firefighting, HazMat, EMS).

Division: The partition of an incident into geographical areas of operation. Divisions are established when the number of resources exceeds the manageable span of control of the Operations Chief. A division is located within the ICS organization between the branch and resources in the Operations Section.

Emergency: Absent a Presidential declared emergency, any incident(s), human-caused or natural, that requires responsive action to protect life or property. Under the Robert T. Stafford Disaster Relief and Emergency Assistance Act, an emergency means any occasion or instance for which, in the determination of the President, Federal assistance is needed to supplement State and local efforts and capabilities to save lives and to protect property and public health and safety, or to lessen or avert the threat of a catastrophe in any part of the United States.

Emergency Alert System (EAS): Broadcasting stations and interconnecting facilities authorized by the Federal Communications Commission to operate in a controlled manner during emergencies. Use of EAS is a critical method of providing emergency warning to the public.

Emergency Management Assistance Compact: The Emergency Management Assistance Compact is an interstate mutual aid agreement that allows States to

Appendix G. Acronyms and Glossary

assist one another in responding to all kinds of natural and man-made disasters. It is administered by the National Emergency Management Association.

Emergency Operations Centers: The physical location at which the coordination of information and resources to support domestic incident management activities normally takes place. An EOC may be a temporary facility or may be located in a more central or permanently established facility, perhaps at a higher level of organization within a jurisdiction. EOCs may be organized by major functional disciplines (e.g., fire, law enforcement, and medical services), by jurisdiction (e.g., Federal, State, regional, County, City, tribal), or some combination thereof.

Emergency Operations Plan: The "steady-state" plan maintained by various jurisdictional levels for responding to a wide variety of potential hazards.

Emergency Public Information: Information that is disseminated primarily in anticipation of an emergency or during an emergency. In addition to providing situational information to the public, it also frequently provides directive actions required to be taken by the general public.

Emergency Response Provider: Includes State, local, and tribal emergency public safety, law enforcement, emergency response, emergency medical (including hospital emergency facilities), and related personnel, agencies, and authorities. See Section 2 (6), Homeland Security Act of 2002, Pub. L. 107-296, 116 Stat. 2135 (2002). Also known as Emergency Responder.

Evacuation: Organized, phased, and supervised withdrawal, dispersal, or removal of civilians from dangerous or potentially dangerous areas, and their reception and care in safe areas.

Evaluation: The process of observing and recording exercise activities, comparing the performance of the participants against the objectives, and identifying strengths and weaknesses.

Event: A planned, non-emergency activity. ICS can be used as the management system for a wide range of events, e.g., parades, concerts, or sporting events.

Exercise: Exercises are a planned and coordinated activity allowing homeland security and emergency management personnel (from first responders to senior officials) to demonstrate training, exercise plans, and practice prevention, protection, response, and recovery capabilities in a realistic but risk-free environment. Exercises are a valuable tool for assessing and improving performance, while demonstrating community resolve to prepare for major incidents.

Federal: Of or pertaining to the Federal Government of the United States of America.

Appendix G. Acronyms and Glossary

Federal Preparedness Funding: Funding designated for developing and/or enhancing State, Territorial, local, and tribal preparedness capabilities. This includes all funding streams that directly or indirectly support Homeland Security initiatives, e.g. Center for Disease Control and Health Resources and Services Administration preparedness funds.

Function: Function refers to the five major activities in ICS: Command, Operations, Planning, Logistics, and Finance/Administration. The term function is also used when describing the activity involved, e.g., the planning function. A sixth function, Intelligence, may be established, if required, to meet incident management needs.

General Staff: A group of incident management personnel organized according to function and reporting to the Incident Commander. The General Staff normally consists of the Operations Section Chief, Planning Section Chief, Logistics Section Chief, and Finance/Administration Section Chief.

Group: Established to divide the incident management structure into functional areas of operation. Groups are composed of resources assembled to perform a special function not necessarily within a single geographic division. Groups, when activated, are located between branches and resources in the Operations Section.

Hazard: Something that is potentially dangerous or harmful, often the root cause of an unwanted outcome.

Homeland Security Exercise and Evaluation Program (HSEEP): A capabilities- and performance-based exercise program that provides a standardized policy, methodology, and language for designing, developing, conducting, and evaluating all exercises. Homeland Security Exercise and Evaluation Program also facilitates the creation of self-sustaining, capabilities-based exercise programs by providing tools and resources such as guidance, training, technology, and direct support. For additional information please visit the Homeland Security Exercise and Evaluation Program toolkit at <http://www.hseep.dhs.gov>.

Improvement Plan: The After Action Report documents the performance of exercise related tasks and makes recommendations for improvements. The Improvement Plan outlines the actions that the exercising jurisdiction(s) plans to take to address recommendations contained in the After Action Report.

Incident: An occurrence or event, natural- or human-caused, that requires an emergency response to protect life or property. Incidents can, for example, include major disasters, emergencies, terrorist attacks, terrorist threats, wildland and urban fires, floods, hazardous materials spills, nuclear accidents, aircraft accidents, earthquakes, hurricanes, tornadoes, tropical storms, war-related disasters, public health and medical emergencies, and other occurrences requiring an emergency response.

Appendix G. Acronyms and Glossary

Incident Action Plan: An oral or written plan containing general objectives reflecting the overall strategy for managing an incident. It may include the identification of operational resources and assignments. It may also include attachments that provide direction and important information for management of the incident during one or more operational periods.

Incident Command Post: The field location at which the primary tactical-level, on-scene incident command functions are performed. The Incident Command post may be collocated with the incident base or other incident facilities and is normally identified by a green rotating or flashing light.

Incident Command System: A standardized on-scene emergency management construct specifically designed to provide for the adoption of an integrated organizational structure that reflects the complexity and demands of single or multiple incidents, without being hindered by jurisdictional boundaries. ICS is the combination of facilities, equipment, personnel, procedures, and communications operating within a common organizational structure, designed to aid in the management of resources during incidents. It is used for all kinds of emergencies and is applicable to small as well as large and complex incidents. ICS is used by various jurisdictions and functional agencies, both public and private, to organize field-level incident management operations.

Incident Commander: The individual responsible for all incident activities, including the development of strategies and tactics and the ordering and the release of resources. The IC has overall authority and responsibility for conducting incident operations and is responsible for the management of all incident operations at the incident site.

Incident Management Team: The IC and appropriate Command and General Staff personnel assigned to an incident.

Incident Objectives: Statements of guidance and direction necessary for selecting appropriate strategy(s) and the tactical direction of resources. Incident objectives are based on realistic expectations of what can be accomplished when all allocated resources have been effectively deployed. Incident objectives must be achievable and measurable, yet flexible enough to allow strategic and tactical alternatives.

Incident-Specific Hazards: Anticipated events that may or may not occur that require coordinated response to protect life or property, e.g., pandemic flu, avian flu, etc.

Initial Action: The actions taken by those responders first to arrive at an incident site.

Initial Response: Resources initially committed to an incident.

Intelligence Officer: The intelligence officer is responsible for managing internal information, intelligence, and operational security requirements

Appendix G. Acronyms and Glossary

supporting incident management activities. These may include information security and operational security activities, as well as the complex task of ensuring that sensitive information of all types (e.g., classified information, law enforcement sensitive information, proprietary information, or export-controlled information) is handled in a way that not only safeguards the information, but also ensures that it gets to those who need access to it to perform their missions effectively and safely.

Interagency: An organization or committee comprised of multiple agencies.

Interoperability & Compatibility: A principle of the NIMS that holds that systems must be able to work together and should not interfere with one another if the multiple jurisdictions, organizations, and functions that come together under the NIMS are to be effective in domestic incident management. Interoperability and compatibility are achieved through the use of such tools as common communications and data standards, digital data formats, equipment standards, and design standards. (Department of Homeland Security, National Incident Management System (March 2004), 55.)

Inventory: An itemized list of current assets such as a catalog of the property or estate, or a list of goods on hand.

Joint Information Center: A facility established to coordinate all incident-related public information activities. It is the central point of contact for all news media at the scene of the incident. Public information officials from all participating agencies should collocate at the Joint Information Center.

Joint Information System: Integrates incident information and public affairs into a cohesive organization designed to provide consistent, coordinated, timely information during crisis or incident operations. The mission of the JIS is to provide a structure and system for developing and delivering coordinated interagency messages; developing, recommending, and executing public information plans and strategies on behalf of the IC; advising the IC concerning public affairs issues that could affect a response effort; and controlling rumors and inaccurate information that could undermine public confidence in the emergency response effort.

Jurisdiction: A range or sphere of authority. Public agencies have jurisdiction at an incident related to their legal responsibilities and authority. Jurisdictional authority at an incident can be political or geographical (e.g., City, County, tribal, State, or Federal boundary lines) or functional (e.g., law enforcement, public health).

Lessons Learned: Knowledge gained through operational experience (actual events or exercises) that improve performance of others in the same discipline. For additional information please visit <https://www.llis.dhs.gov/>

Appendix G. Acronyms and Glossary

Liaison: A form of communication for establishing and maintaining mutual understanding and cooperation.

Liaison Officer: A member of the Command Staff responsible for coordinating with representatives from cooperating and assisting agencies.

Local Government: A County, municipality, City, town, township, local public authority, school district, special district, intrastate district, council of governments (regardless of whether the council of governments is incorporated as a nonprofit corporation under State law), regional or interstate government entity, or agency or instrumentality of a local government; an Indian tribe or authorized tribal organization, or in Alaska a Native village or Alaska Regional Native Corporation; a rural community, unincorporated town or village, or other public entity. See Section 2 (10), Homeland Security Act of 2002, Pub. L. 107-296, 116 Stat. 2135 (2002).

Logistics: Providing resources and other services to support incident management.

Logistics Section: The section responsible for providing facilities, services, and material support for the incident.

Major Disaster: As defined under the Robert T. Stafford Disaster Relief and Emergency Assistance Act (42 U.S.C. 5122), a major disaster is:

“any natural catastrophe (including any hurricane, tornado, storm, high water, wind-driven water, tidal wave, tsunami, earthquake, volcanic eruption, landslide, mudslide, snowstorm, or drought), or, regardless of cause, any fire, flood, or explosion, in any part of the United States, which in the determination of the President causes damage of sufficient severity and magnitude to warrant major disaster assistance under this Act to supplement the efforts and available resources of States, tribes, local governments, and disaster relief organizations in alleviating the damage, loss, hardship, or suffering caused thereby.”

Management by Objective: A management approach that involves a four-step process for achieving the incident goal. The Management by Objectives approach includes the following: establishing overarching objectives; developing and issuing assignments, plans, procedures, and protocols; establishing specific, measurable objectives for various incident management functional activities and directing efforts to fulfill them, in support of defined strategic objectives; and documenting results to measure performance and facilitate corrective action.

Mitigation: The activities designed to reduce or eliminate risks to persons or property or to lessen the actual or potential effects or consequences of an incident. Mitigation measures may be implemented prior to, during, or after an incident. Mitigation measures are often informed by lessons learned from prior incidents. Mitigation involves ongoing actions to reduce exposure to, probability of, or

Appendix G. Acronyms and Glossary

potential loss from hazards. Measures may include zoning and building codes, floodplain buyouts, and analysis of hazard-related data to determine where it is safe to build or locate temporary facilities. Mitigation can include efforts to educate governments, businesses, and the public on measures they can take to reduce loss and injury.

Mobilization: The process and procedures used by all organizations-State, local, and tribal-for activating, assembling, and transporting all resources that have been requested to respond to or support an incident.

Multi-agency Coordination Entity: A multi-agency coordination entity functions within a broader multi-agency coordination system. It may establish the priorities among incidents and associated resource allocations, de-conflict agency policies, and provide strategic guidance and direction to support incident management activities.

Multi-Agency Coordination Group: The Clatsop County MAC Group will be chaired by the Sheriff or designee and will include at a minimum the Sheriff, Director of Transportation and Development, Public Health Director, and the County Fire Defense Board Chief.

Multi-agency Coordination Systems: Multi-agency coordination systems provide the architecture to support coordination for incident prioritization, critical resource allocation, communications systems integration, and information coordination. The components of multi-agency coordination systems include facilities, equipment, emergency operation centers (EOCs), specific multi-agency coordination entities, personnel, procedures, and communications. These systems assist agencies and organizations to fully integrate the subsystems of the NIMS.

Multi-jurisdictional Incident: An incident requiring action from multiple agencies that each have jurisdiction to manage certain aspects of an incident. In ICS, these incidents will be managed under Unified Command.

Mutual Aid Agreement: Written agreement between agencies and/or jurisdictions that they will assist one another on request, by furnishing personnel, equipment, and/or expertise in a specified manner.

National: Of a nationwide character, including the State, local, and tribal aspects of governance and policy.

National Disaster Medical System: A cooperative, asset-sharing partnership between the Department of Health and Human Services, the Department of Veterans Affairs, the Department of Homeland Security, and the Department of Defense. National Disaster Medical System provides resources for meeting the continuity of care and mental health services requirements of the ESF 8 in the National Response Framework.

National Incident Management System: A system mandated by HSPD-5 that provides a consistent nationwide approach for State, local, and tribal

Appendix G. Acronyms and Glossary

governments; the private-sector, and nongovernmental organizations to work effectively and efficiently together to prepare for, respond to, and recover from domestic incidents, regardless of cause, size, or complexity. To provide for interoperability and compatibility among State, local, and tribal capabilities, the NIMS includes a core set of concepts, principles, and terminology. HSPD-5 identifies these as the ICS; multi-agency coordination systems; training; identification and management of resources (including systems for classifying types of resources); qualification and certification; and the collection, tracking, and reporting of incident information and incident resources.

National Response Plan: A plan mandated by HSPD-5 that integrates Federal domestic prevention, preparedness, response, and recovery plans into one all-discipline, all-hazards plan.

National Response Framework: A guide to how the Nation conducts all-hazards incident management. It is built upon flexible, scalable, and adaptable coordinating structures to align key roles and responsibilities across the Nation. It is intended to capture specific authorities and best practices for managing incidents that range from the serious but purely local, to large-scale terrorist attacks or catastrophic natural disasters. The National Response Framework replaces the former National Response Plan.

National Warning System (NAWAS): Used for the dissemination of warning and other emergency information from federal and state warning points to the county warning points. It is a dedicated, nationwide, party line telephone warning system operated on a 24-hour basis.

Non-Governmental Organization: An entity with an association that is based on interests of its members, individuals, or institutions and that is not created by a government, but may work cooperatively with government. Such organizations serve a public purpose, not a private benefit. Examples of Non-Governmental Organizations include faith-based charity organizations and the American Red Cross.

No-Notice Events: An occurrence or event, natural or human-caused, that requires an emergency response to protect life or property (i.e. terrorist attacks and threats, wildland and urban fires, floods, hazardous materials spills, nuclear accident, aircraft accident, earthquakes, hurricanes, tornadoes, public health and medical emergencies etc.)

Oregon Emergency Response System (OERS): Provides coordinated notification to state and federal agencies in response to incidents involving chemicals, petroleum products, biological agents, radioactive materials, and other technological and natural hazards. It is the only phone number that local agencies and industry need to call in order to notify appropriate state and federal agencies (1-800-452-0311).

Appendix G. Acronyms and Glossary

Operational Period: The time scheduled for executing a given set of operation actions, as specified in the Incident Action Plan. Operational periods can be of various lengths, although usually not over 24 hours.

Operations Section: The section responsible for all tactical incident operations. In ICS, it normally includes subordinate branches, divisions, and/or groups.

Personnel Accountability: The ability to account for the location and welfare of incident personnel. It is accomplished when supervisors ensure that ICS principles and processes are functional and that personnel are working within established incident management guidelines.

Plain Language: Common terms and definitions that can be understood by individuals from all responder disciplines. The intent of plain language is to ensure the clear and accurate communication of information during an incident. For additional information, refer to http://www.fema.gov/pdf/emergency/nims/plain_lang.pdf.

Planning: A method to developing objectives to be accomplished and incorporated into an EOP.

Planning Meeting: A meeting held as needed prior to and throughout the duration of an incident to select specific strategies and tactics for incident control operations and for service and support planning. For larger incidents, the planning meeting is a major element in the development of the IAP.

Planning Section: Responsible for the collection, evaluation, and dissemination of operational information related to the incident, and for the preparation and documentation of the IAP. This section also maintains information on the current and forecasted situation and on the status of resources assigned to the incident.

Policy Group: Composed of the Sheriff, BOCC, County Manager, County Council, Director of Transportation and Development, Public Health Department Director and the County Fire Defense Board Chief.

Preparedness: The range of deliberate, critical tasks and activities necessary to build, sustain, and improve the operational capability to prevent, protect against, respond to, and recover from domestic incidents. Preparedness is a continuous process. Preparedness involves efforts at all levels of government and between government and private-sector and nongovernmental organizations to identify threats, determine vulnerabilities, and identify required resources. Within the NIMS, preparedness is operationally focused on establishing guidelines, protocols, and standards for planning, training and exercises, personnel qualification and certification, equipment certification, and publication management.

Preparedness Organizations: The groups that provide interagency coordination for domestic incident management activities in a non-emergency context. Preparedness organizations can include all agencies with a role in incident

Appendix G. Acronyms and Glossary

management, for prevention, preparedness, response, or recovery activities. They represent a wide variety of committees, planning groups, and other organizations that meet and coordinate to ensure the proper level of planning, training, equipping, and other preparedness requirements within a jurisdiction or area.

Preplanned Event: A preplanned event is a non-emergency activity. ICS can be used as the management system for events such as parades, concerts, or sporting events, etc.

Prevention: Actions to avoid an incident or to intervene to stop an incident from occurring. Prevention involves actions to protect lives and property. It involves applying intelligence and other information to a range of activities that may include such countermeasures as deterrence operations; heightened inspections; improved surveillance and security operations; investigations to determine the full nature and source of the threat; public health and agricultural surveillance and testing processes; immunizations, isolation, or quarantine; and, as appropriate, specific law enforcement operations aimed at deterring, preempting, interdicting, or disrupting illegal activity and apprehending potential perpetrators and bringing them to justice.

Private Sector: Organizations and entities that are not part of any governmental structure. It includes for-profit and not-for-profit organizations, formal and informal structures, commerce and industry, and private voluntary organizations.

Processes: Systems of operations that incorporate standardized procedures, methodologies, and functions necessary to provide resources effectively and efficiently. These include resource typing, resource ordering and tracking, and coordination.

Public Information Officer (PIO): A member of the Command Staff responsible for interfacing with the public and media or with other agencies with incident-related information requirements.

Public Information Systems: The processes, procedures, and systems for communicating timely and accurate information to the public during crisis or emergency situations.

Publications Management: The publications management subsystem includes materials development, publication control, publication supply, and distribution. The development and distribution of NIMS materials is managed through this subsystem. Consistent documentation is critical to success, because it ensures that all responders are familiar with the documentation used in a particular incident regardless of the location or the responding agencies involved.

Qualification and Certification: This subsystem provides recommended qualification and certification standards for emergency responder and incident management personnel. It also allows the development of minimum standards for

Appendix G. Acronyms and Glossary

resources expected to have an interstate application. Standards typically include training, currency, experience, and physical and medical fitness.

Reception Area: This refers to a location separate from staging areas, where resources report in for processing and out-processing. Reception Areas provide accountability, security, situational awareness briefings, safety awareness, distribution of IAPs, supplies and equipment, feeding, and bed down.

Recovery: The development, coordination, and execution of service- and site-restoration plans; the reconstitution of government operations and services; individual, private-sector, nongovernmental, and public-assistance programs to provide housing and to promote restoration; long-term care and treatment of affected persons; additional measures for social, political, environmental, and economic restoration; evaluation of the incident to identify lessons learned; post-incident reporting; and development of initiatives to mitigate the effects of future incidents.

Recovery Plan: A plan developed by a State, local, or tribal jurisdiction with assistance from responding Federal agencies to restore the affected area.

Resources: Personnel and major items of equipment, supplies, and facilities available or potentially available for assignment to incident operations and for which status is maintained. Resources are described by kind and type and may be used in operational support or supervisory capacities at an incident or at an EOC.

Resource Management: Efficient incident management requires a system for identifying available resources at all jurisdictional levels to enable timely and unimpeded access to resources needed to prepare for, respond to, or recover from an incident. Resource management under the NIMS includes mutual-aid agreements; the use of special State, local, and tribal teams; and resource mobilization protocols.

Resource Typing: Resource typing is the categorization of resources that are commonly exchanged through mutual aid during disasters. Resource typing definitions help define resource capabilities for ease of ordering and mobilization during a disaster. For additional information please visit <http://www.fema.gov/emergency/nims/rm/rt.shtm> .

Resource Typing Standard: Categorization and description of response resources that are commonly exchanged in disasters through mutual aid agreements. The FEMA/NIMS Integration Center Resource typing definitions provide emergency responders with the information and terminology they need to request and receive the appropriate resources during an emergency or disaster.

Resources Unit: Functional unit within the Planning Section responsible for recording the status of resources committed to the incident. This unit also evaluates resources currently committed to the incident, the effects additional responding resources will have on the incident, and anticipated resource needs.

Appendix G. Acronyms and Glossary

Response: Activities that address the short-term, direct effects of an incident. Response includes immediate actions to save lives, protect property, and meet basic human needs. Response also includes the execution of emergency operations plans and of mitigation activities designed to limit the loss of life, personal injury, property damage, and other unfavorable outcomes. As indicated by the situation, response activities include applying intelligence and other information to lessen the effects or consequences of an incident; increased security operations; continuing investigations into nature and source of the threat; ongoing public health and agricultural surveillance and testing processes; immunizations, isolation, or quarantine; and specific law enforcement operations aimed at preempting, interdicting, or disrupting illegal activity, and apprehending actual perpetrators and bringing them to justice.

Safety Officer: A member of the Command Staff responsible for monitoring and assessing safety hazards or unsafe situations and for developing measures for ensuring personnel safety.

Scalability: The ability of incident managers to adapt to incidents by either expanding or reducing the resources necessary to adequately manage the incident, including the ability to incorporate multiple jurisdictions and multiple responder disciplines.

Section: The organizational level having responsibility for a major functional area of incident management, e.g., Operations, Planning, Logistics, Finance/Administration, and Intelligence (if established). The section is organizationally situated between the branch and the Incident Command.

Span of Control: The number of individuals a supervisor is responsible for, usually expressed as the ratio of supervisors to individuals. (Under the NIMS, an appropriate span of control is between 1:3 and 1:7.)

Staging Area: Location established where resources can be placed while awaiting a tactical assignment. The Operations Section manages Staging Areas.

Standard Operating Procedures: A complete reference document that details the procedures for performing a single function or a number of independent functions.

Standardization: A principle of the NIMS that provides a set of standardized organizational structures (such as the ICS, multi-agency coordination systems, and public information systems) as well as requirements for processes, procedures, and systems designed to improve interoperability among jurisdictions and disciplines in various areas, including: training; resource management; personnel qualification and certification; equipment certification; communications and information management; technology support; and continuous system improvement. (Department of Homeland Security, National Incident Management System (March 2004), 2.)

Appendix G. Acronyms and Glossary

State: When capitalized, refers to any State of the United States, the District of Columbia, the Commonwealth of Puerto Rico, the Virgin Islands, Guam, American Samoa, the Commonwealth of the Northern Mariana Islands, and any possession of the United States. See Section 2 (14), Homeland Security Act of 2002, Pub. L. 107-296, 116 Stat. 2135 (2002).

Strategic: Strategic elements of incident management are characterized by continuous long-term, high-level planning by organizations headed by elected or other senior officials. These elements involve the adoption of long-range goals and objectives, the setting of priorities; the establishment of budgets and other fiscal decisions, policy development, and the application of measures of performance or effectiveness.

Strategy: The general direction selected to accomplish incident objectives set by the IC.

Strike Team: A set number of resources of the same kind and type that have an established minimum number of personnel.

Supporting Technologies: Any technology that may be used to support the NIMS is included in this subsystem. These technologies include orthophoto mapping, remote automatic weather stations, infrared technology, and communications, among various others.

Task Force: Any combination of resources assembled to support a specific mission or operational need. All resource elements within a Task Force must have common communications and a designated leader.

Technical Assistance: Support provided to State, local, and tribal jurisdictions when they have the resources but lack the complete knowledge and skills needed to perform a required activity (such as mobile-home park design and hazardous material assessments).

Terrorism: Under the Homeland Security Act of 2002, terrorism is defined as activity that involves an act dangerous to human life or potentially destructive of critical infrastructure or key resources and is a violation of the criminal laws of the United States or of any State or other subdivision of the United States in which it occurs and is intended to intimidate or coerce the civilian population or influence a government or affect the conduct of a government by mass destruction, assassination, or kidnapping. See Section 2 (15), Homeland Security Act of 2002, Pub. L. 107-296, 116 Stat. 2135 (2002).

Threat: An indication of possible violence, harm, or danger.

Tools: Those instruments and capabilities that allow for the professional performance of tasks, such as information systems, agreements, doctrine, capabilities, and legislative authorities.

Appendix G. Acronyms and Glossary

Training: Specialized instruction and practice to improve performance and lead to enhanced emergency management capabilities.

Tribal: Any Indian tribe, band, nation, or other organized group or community, including any Alaskan Native Village as defined in or established pursuant to the Alaskan Native Claims Settlement Act (85 stat. 688) [43 U.S.C.A. and 1601 et seq.], that is recognized as eligible for the special programs and services provided by the United States to Indians because of their status as Indians.

Type: A classification of resources in the ICS that refers to capability. Type 1 is generally considered to be more capable than Types 2, 3, or 4, respectively, because of size; power; capacity; or, in the case of incident management teams, experience and qualifications.

Unified Area Command: A Unified Area Command is established when incidents under an Area Command are multi-jurisdictional.

Unified Command: An application of ICS used when there is more than one agency with incident jurisdiction or when incidents cross political jurisdictions. Agencies work together through the designated members of the UC, often the senior person from agencies and/or disciplines participating in the UC, to establish a common set of objectives and strategies and a single IAP.

Unit: The organizational element having functional responsibility for a specific incident planning, logistics, or finance/administration activity.

Unity of Command: The concept by which each person within an organization reports to one and only one designated person. The purpose of unity of command is to ensure unity of effort under one responsible commander for every objective.

Utility: Structures or systems of any company or co-op, providing water storage, supply, or distribution; sewage collection and treatment; telephone; electricity; natural gas and other fuels; or other similar public service.

Vector: A vector (or carrier) is any organism capable of transmitting disease. Some examples are fleas, ticks, mosquitoes and rodents. Vectors are able to spread disease to humans by biting, burrowing or contaminating our living spaces.

Vector Control: Control of diseases spread by insects, rodents, etc.

Voluntary Organization: Any chartered or otherwise recognized tax-exempt local, state, or national organization which has provided or may provide services to the state, local governments, or individuals in a disaster or emergency.

Volunteer: For purposes of the NIMS, a volunteer is any individual accepted to perform services by the lead agency, which has authority to accept volunteer services, when the individual performs services without promise, expectation, or

Appendix G. Acronyms and Glossary

receipt of compensation for services performed. See, e.g., 16 U.S.C. 742f(c) and 29 CFR 553.101.

Source: <https://nimcast.fema.gov/nimscast/index.jsp>

Vulnerability: Susceptibility of life, property, or the environment to damage if a hazard manifests to potential.
