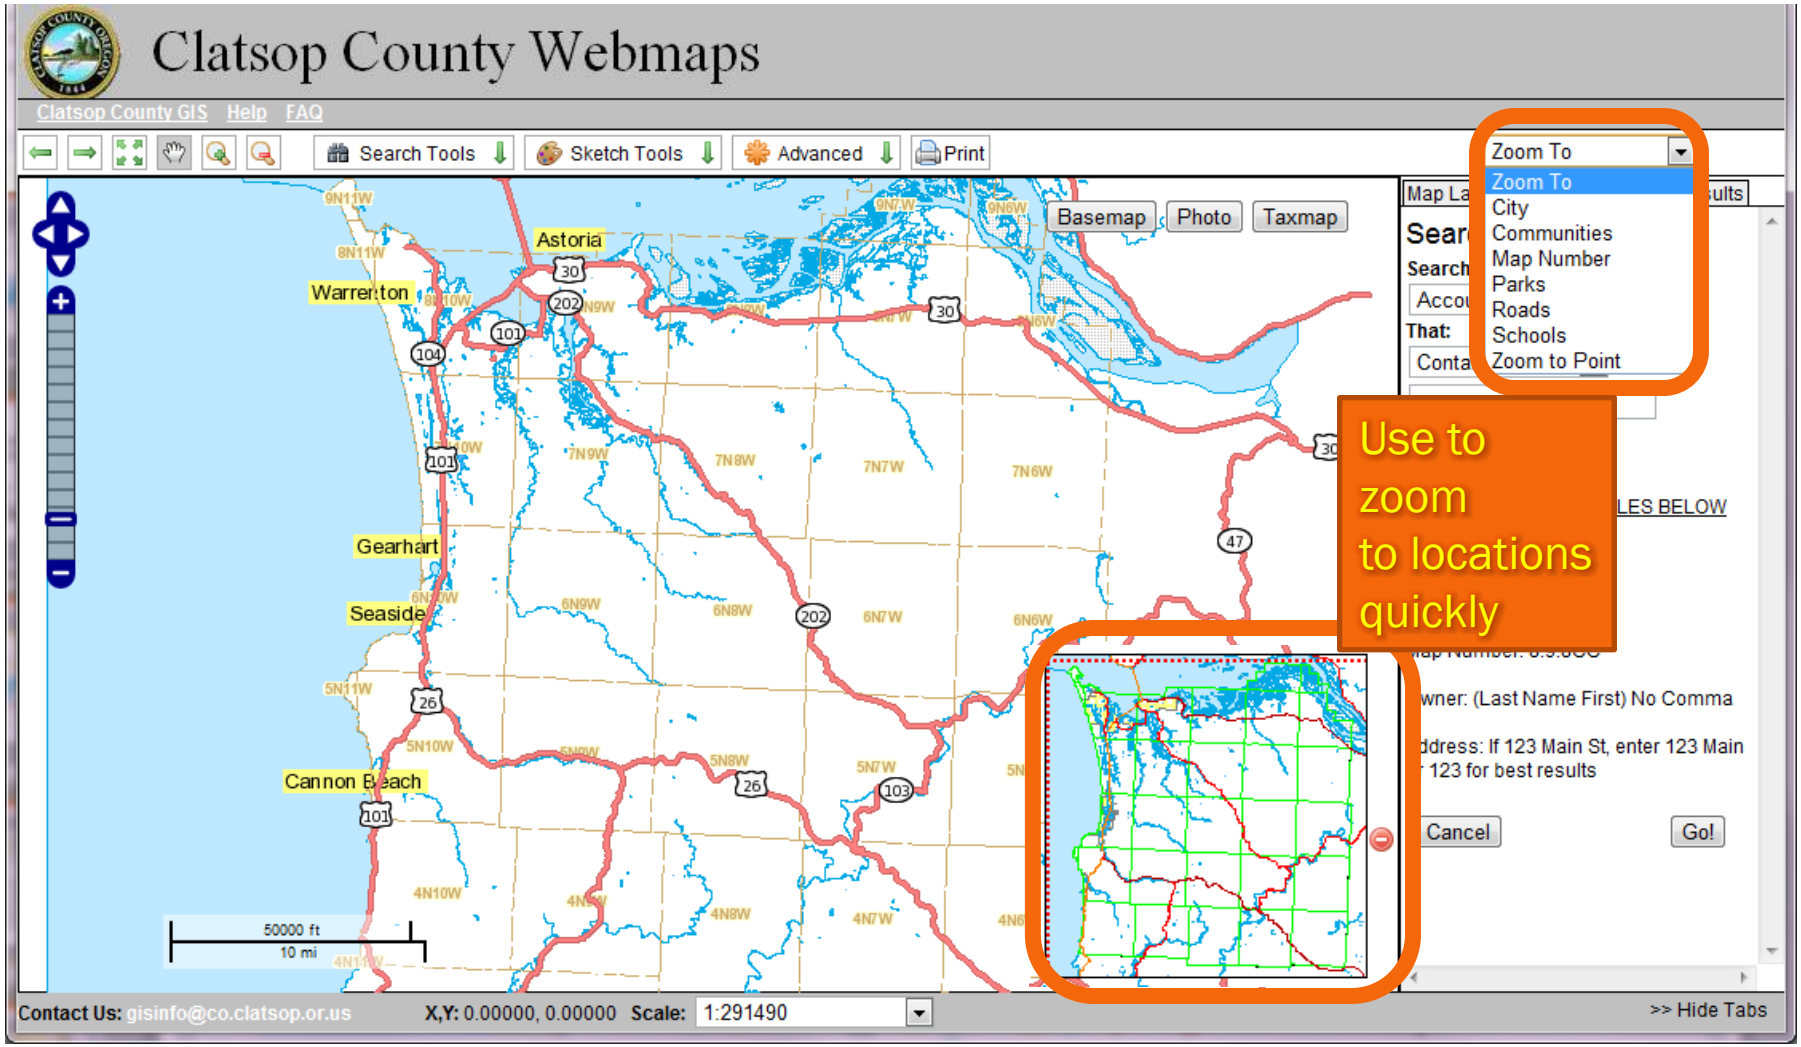
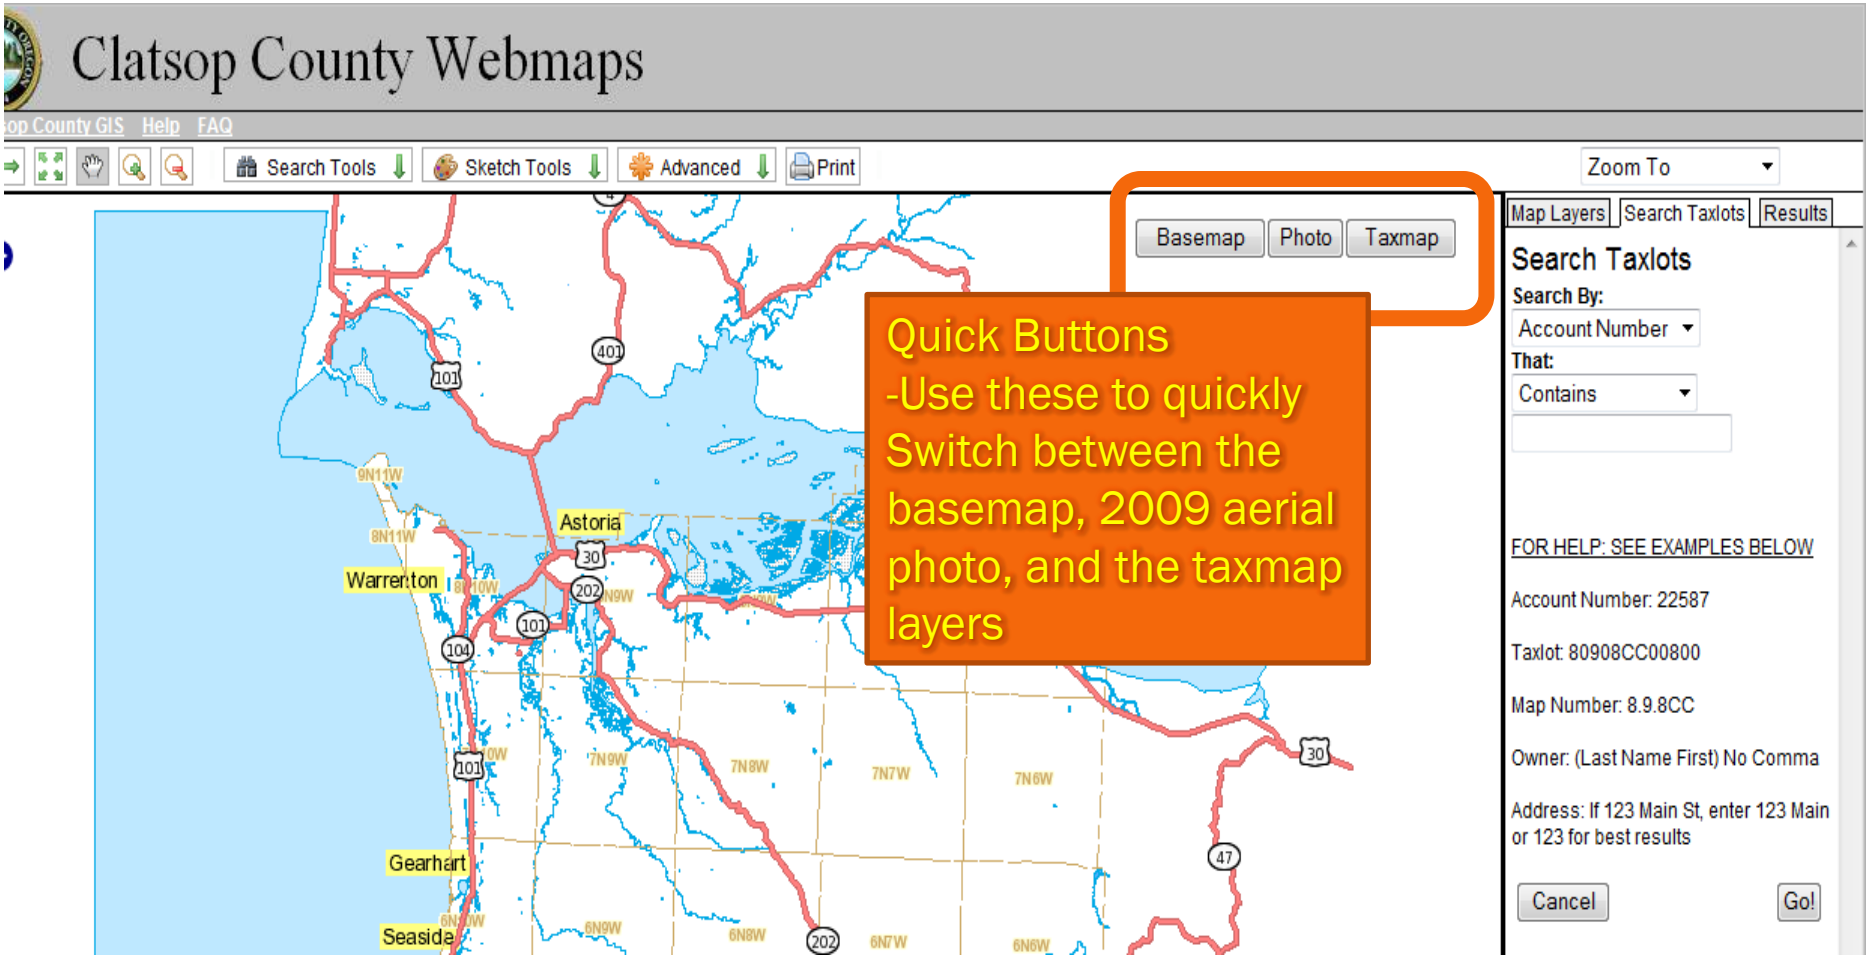
Ways to quickly move around the map...

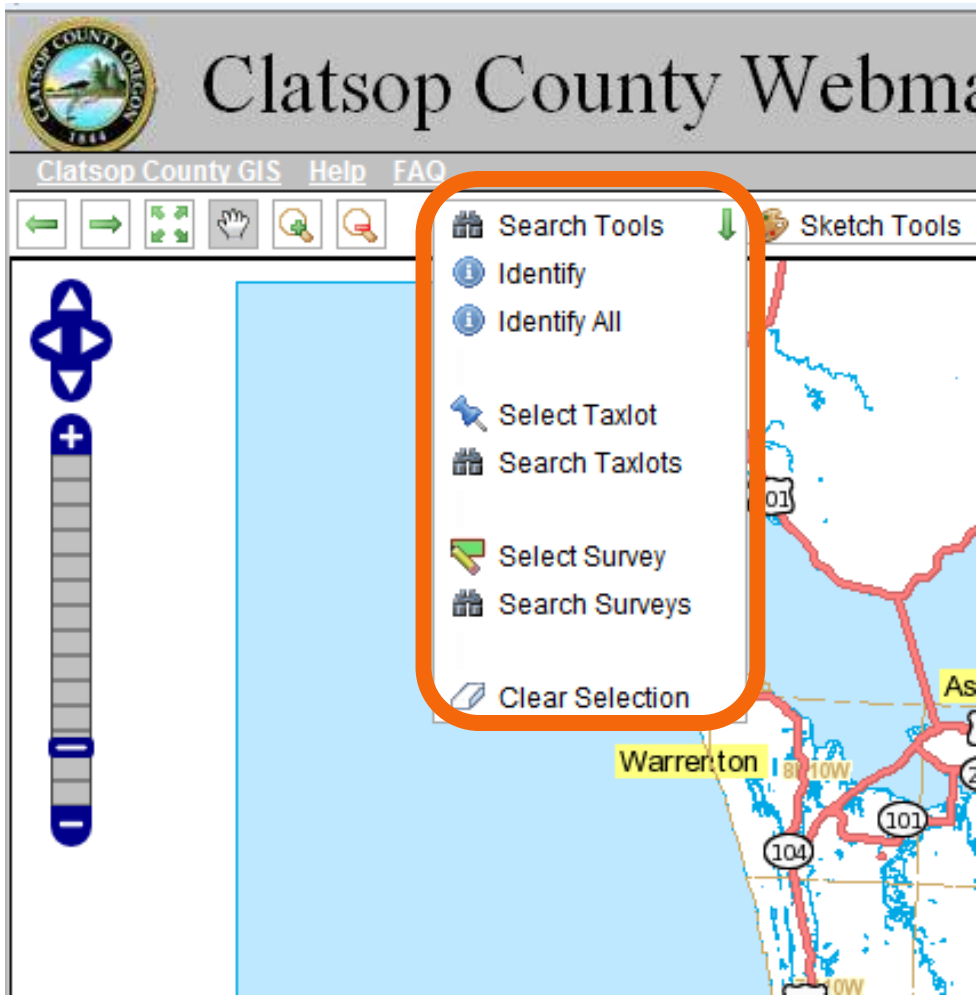


Quick Buttons

- Basemap
- 2009 Aerial Photo
- Taxmap

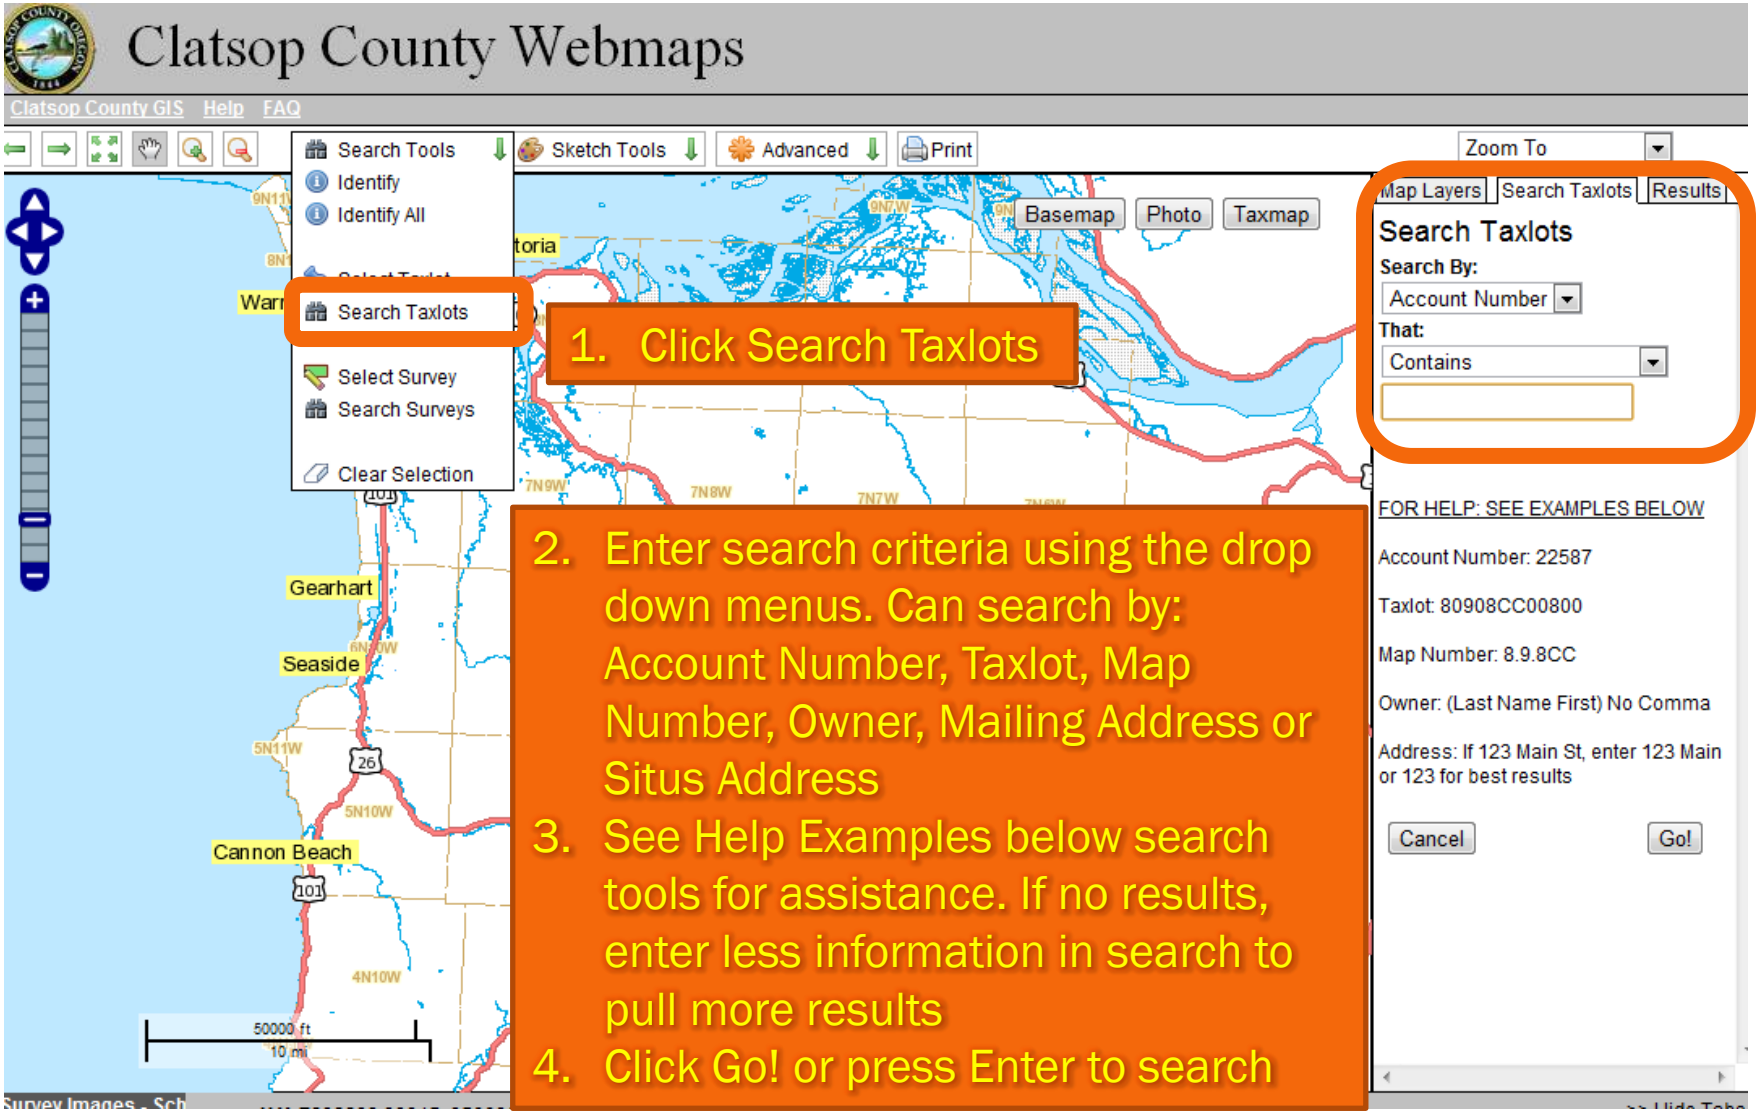


Search, Selection & Identify Tools



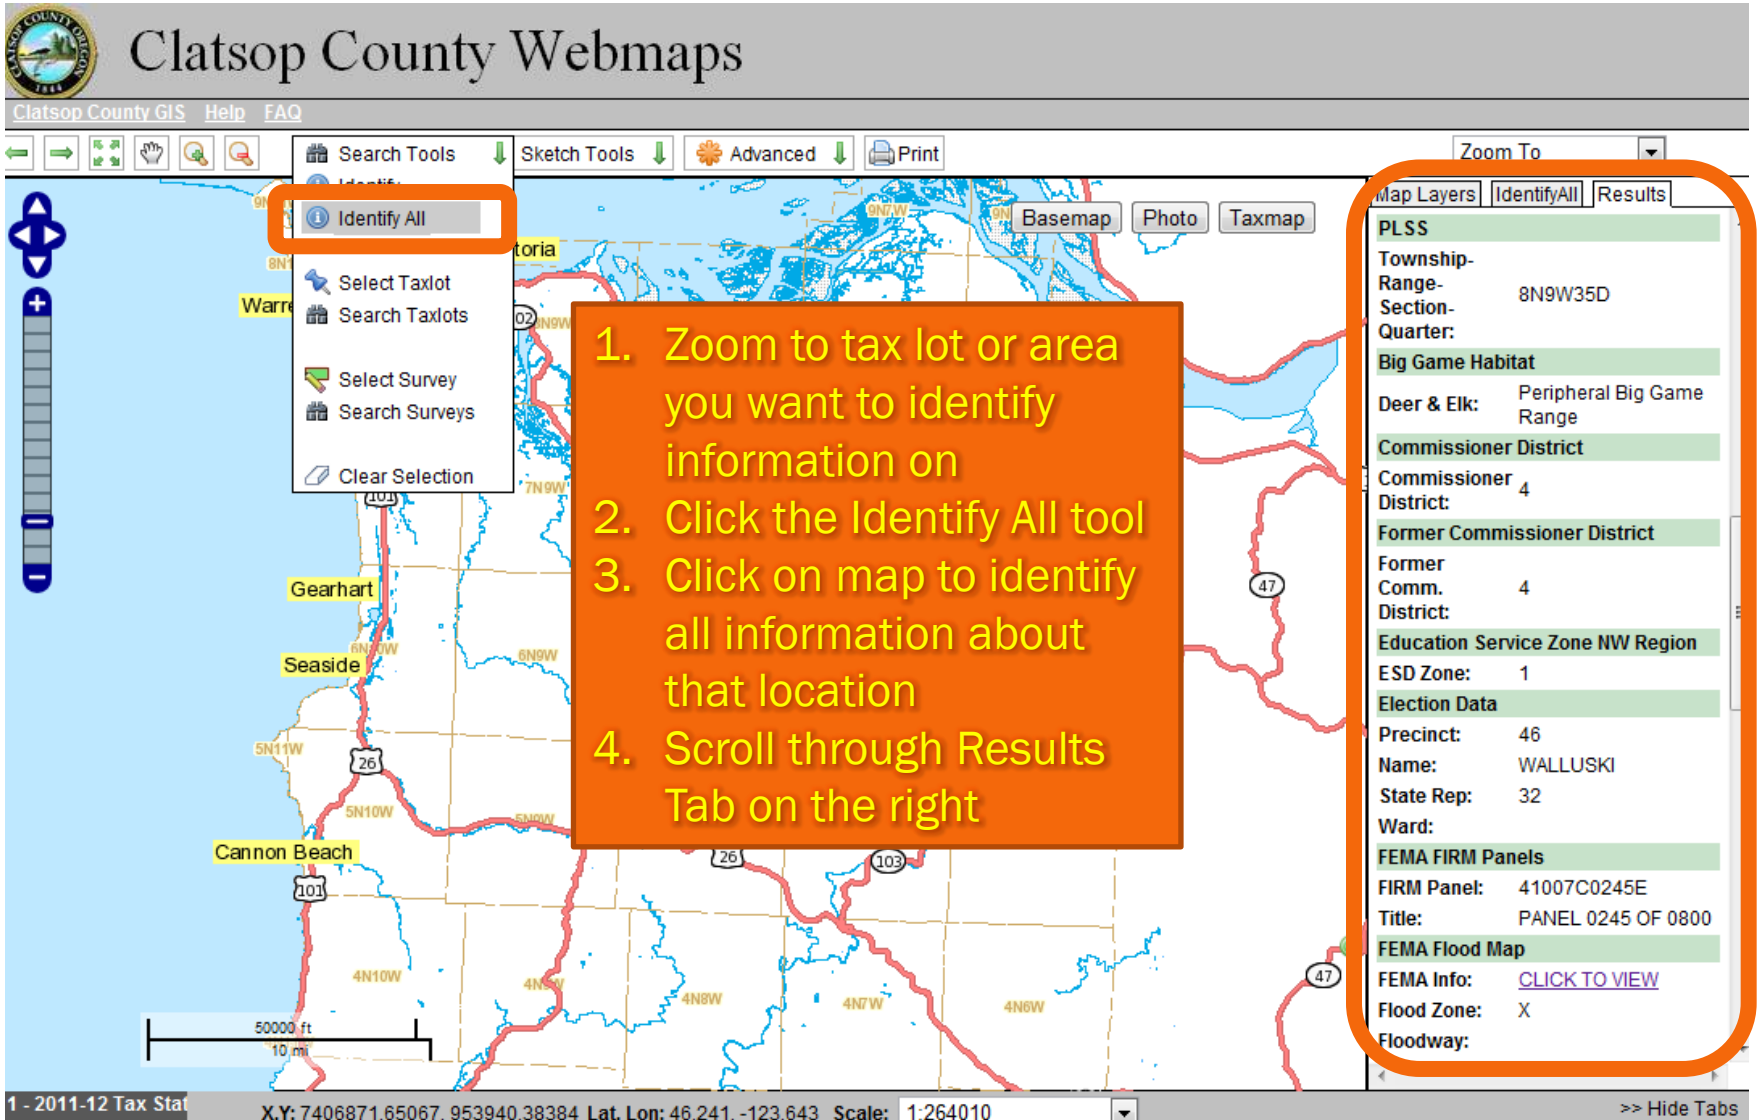
- Identify
  - Identifies information **only** on the layers that you have turned on
- Identify All
  - Identifies all the common layers for that location, even if they are not turned on in the Map Layers tab
- Select Tax Lot
  - Used to select one or many tax lots, create **buffer**, create **mailing lists**
  - Can select tax lots by a point, line, polygon or box
- Search Surveys
  - Used to search the surveys
- Select Survey
  - Use this tool to click on the map and select any surveys that are in that location

How to find a Tax Lot



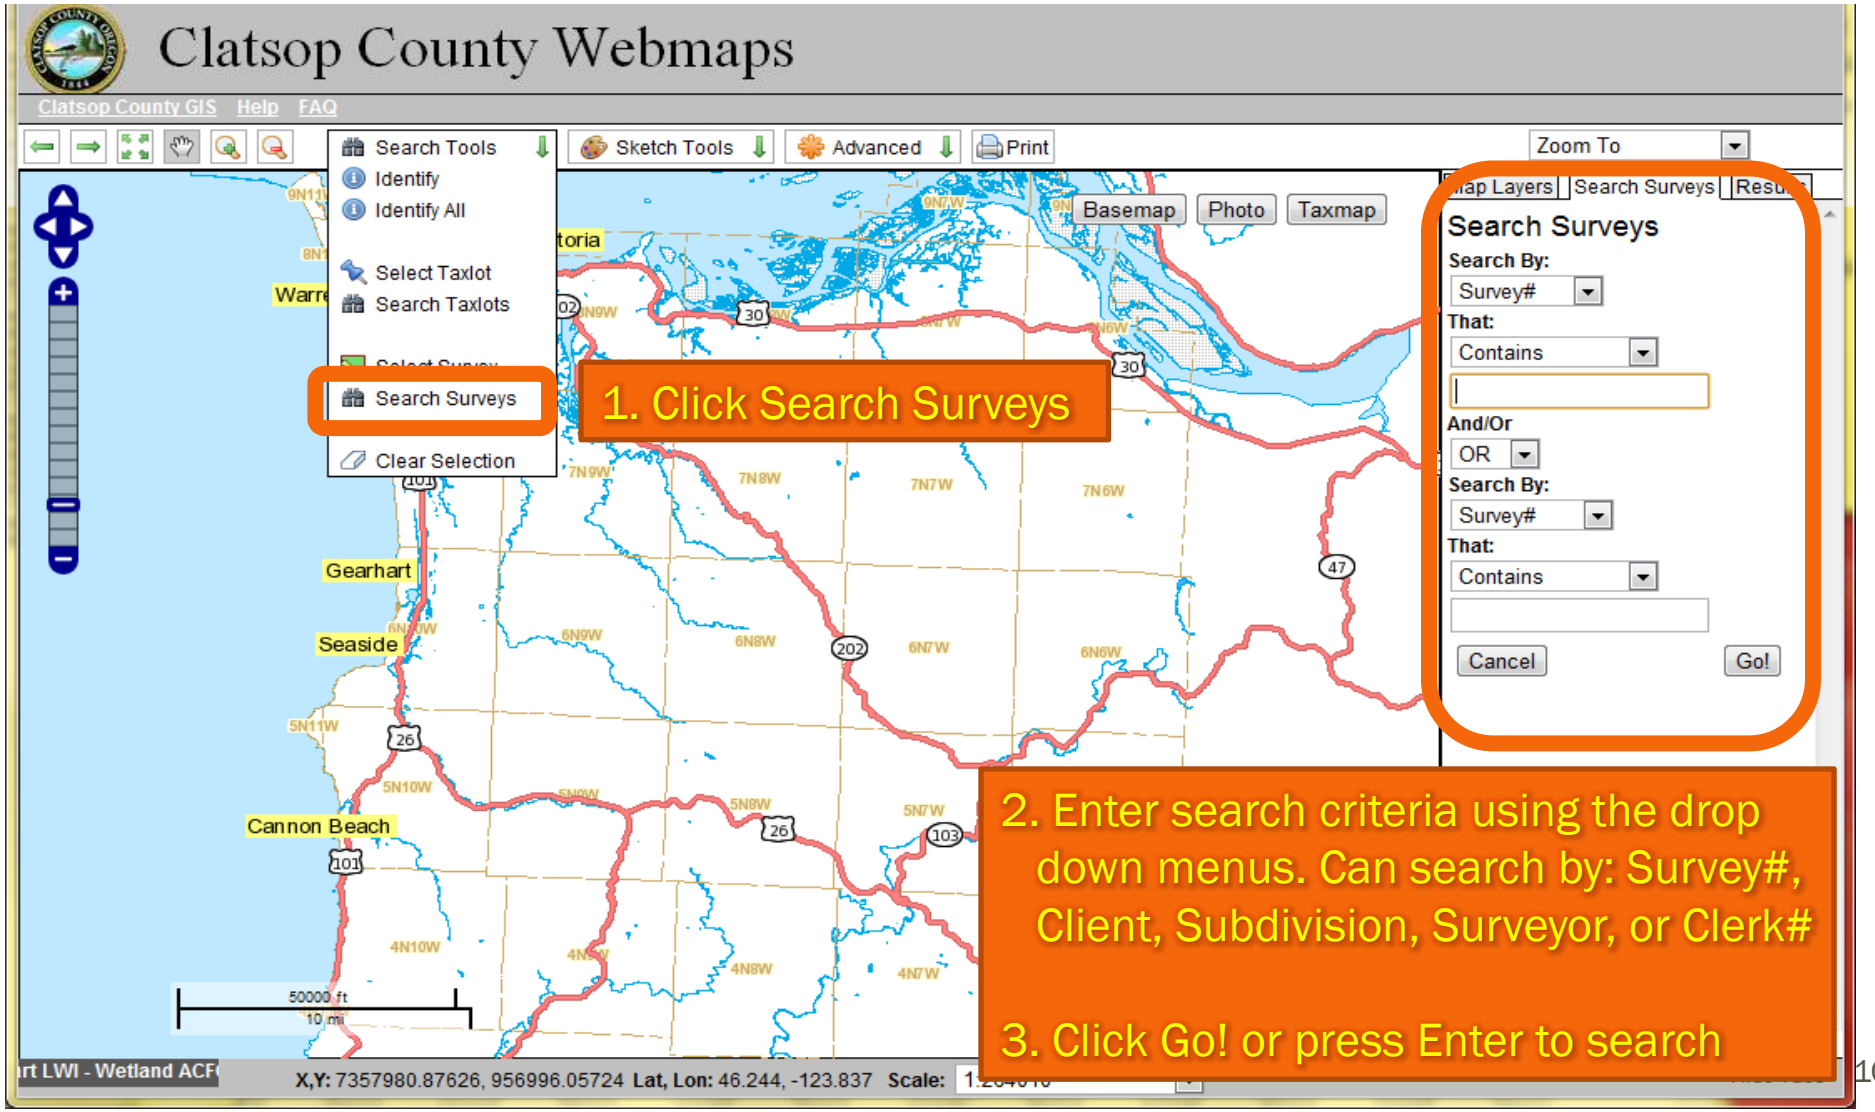
How to identify all information about a Tax Lot

- Districts
- Zoning
- Floodplains
- Hazards
- Elevation
- Boundaries
- Service Areas
- Soils
- Surveys
- Taxcodes



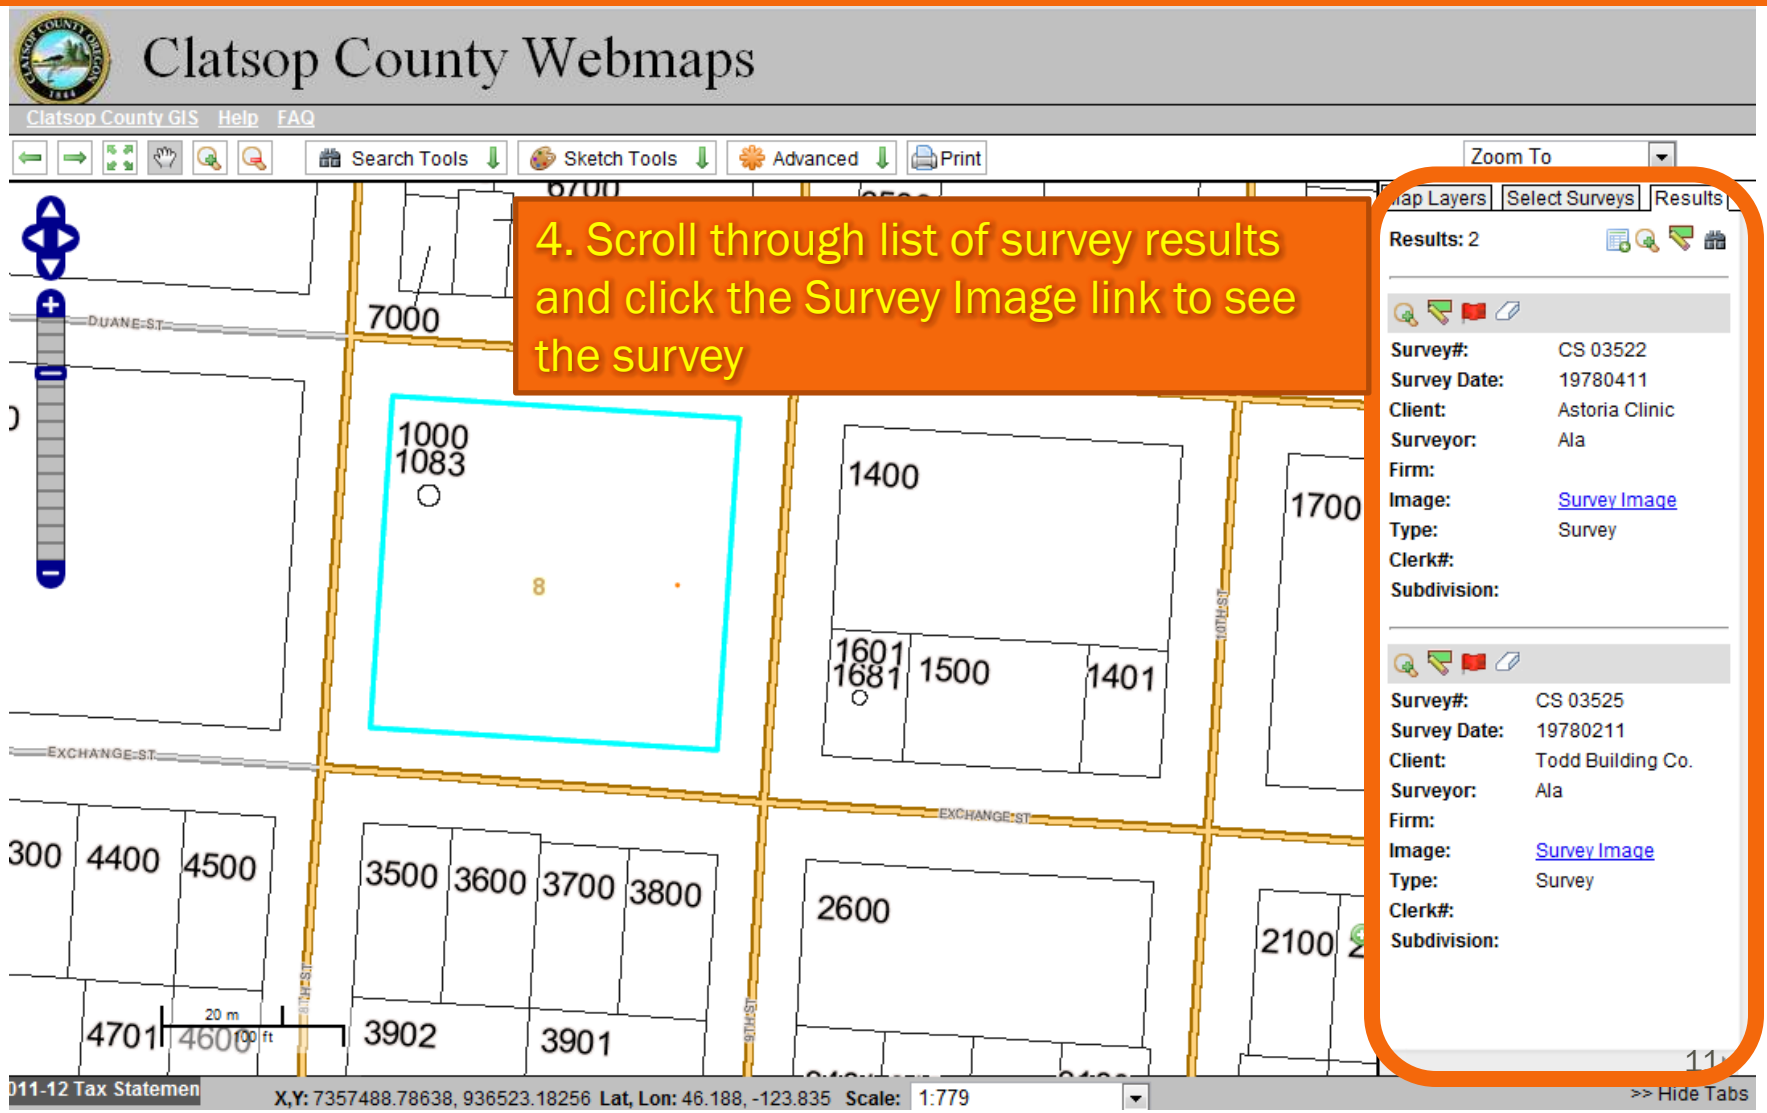
How to find a Survey

Step 1-3 of 6



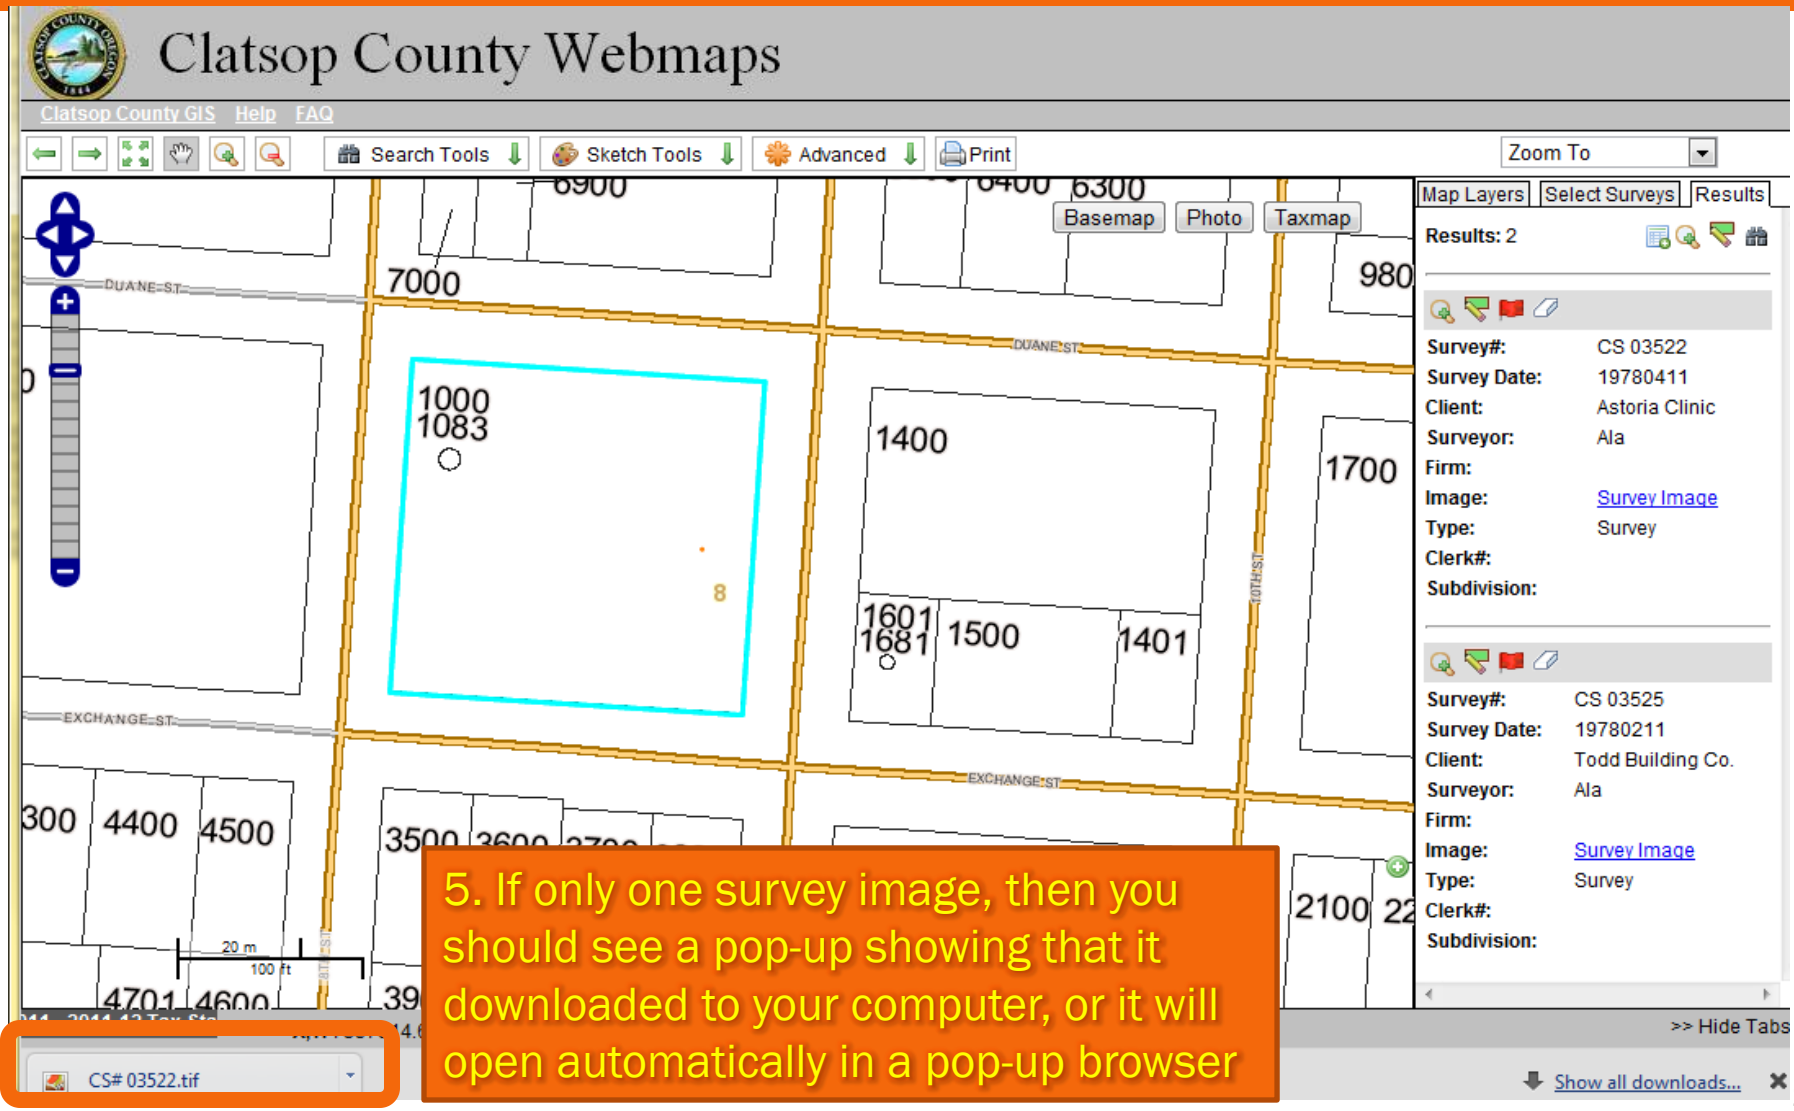
How to find a Survey

Step 4 of 6



How to find a Survey

Step 5 of 6



5. If only one survey image, then you should see a pop-up showing that it downloaded to your computer, or it will open automatically in a pop-up browser

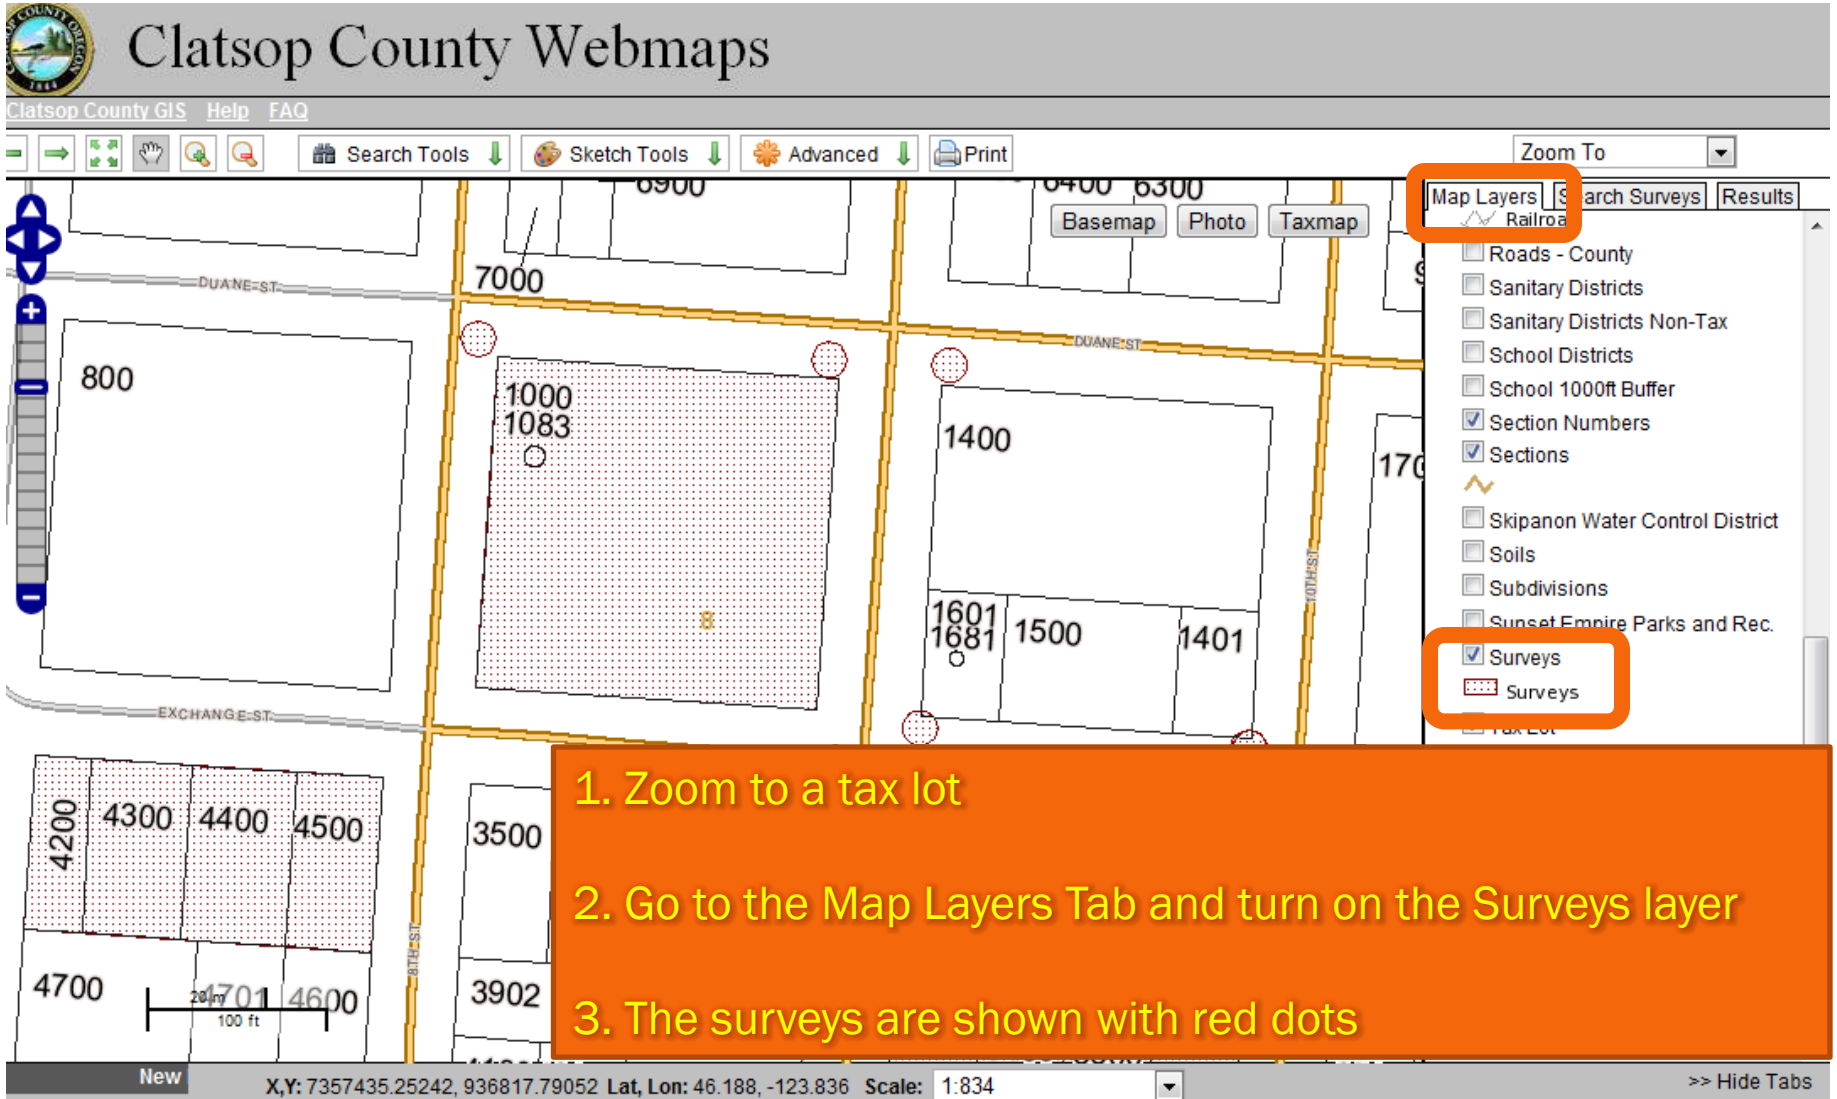
How to find a Survey

Step 6 of 6

6. If more than one survey image, it will open a pop-up browser showing links to the multiple images

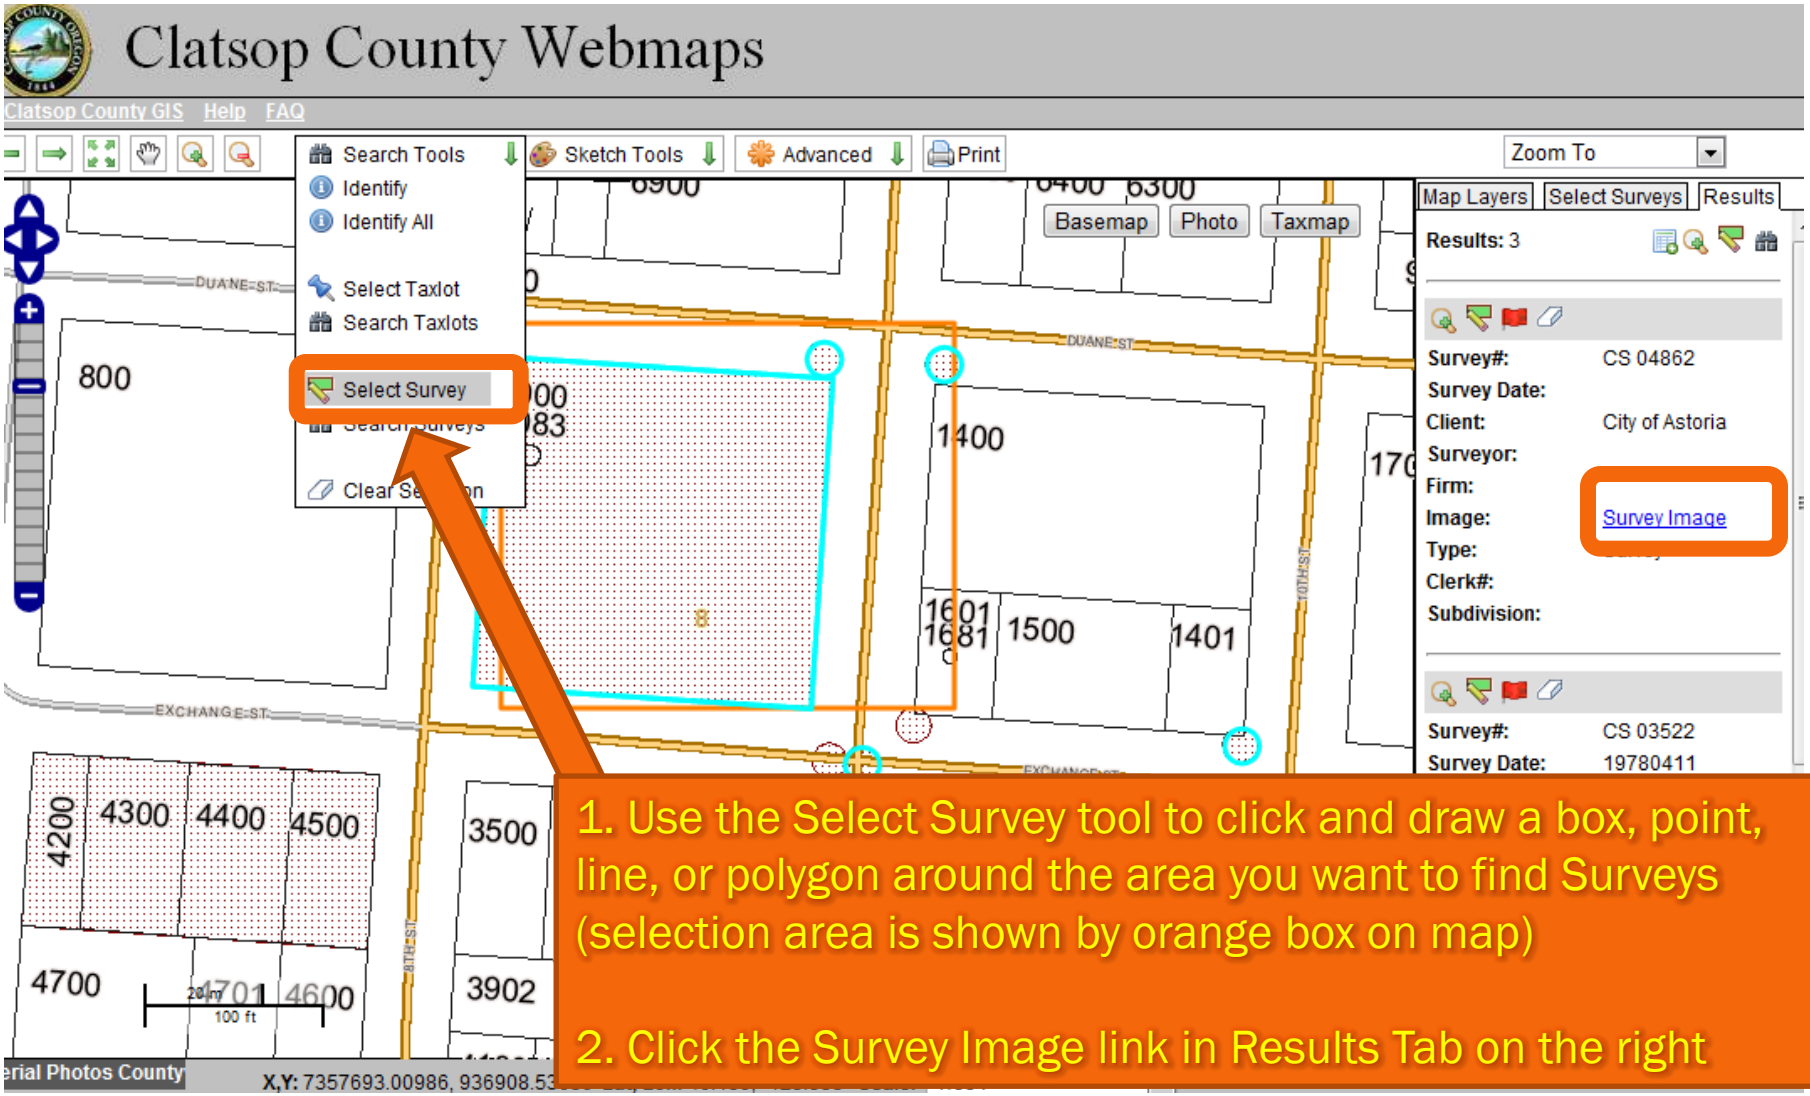
How to find if there's a Survey on a Tax Lot

Step 1-3 of 5



How to find if there's a Survey on a Tax Lot

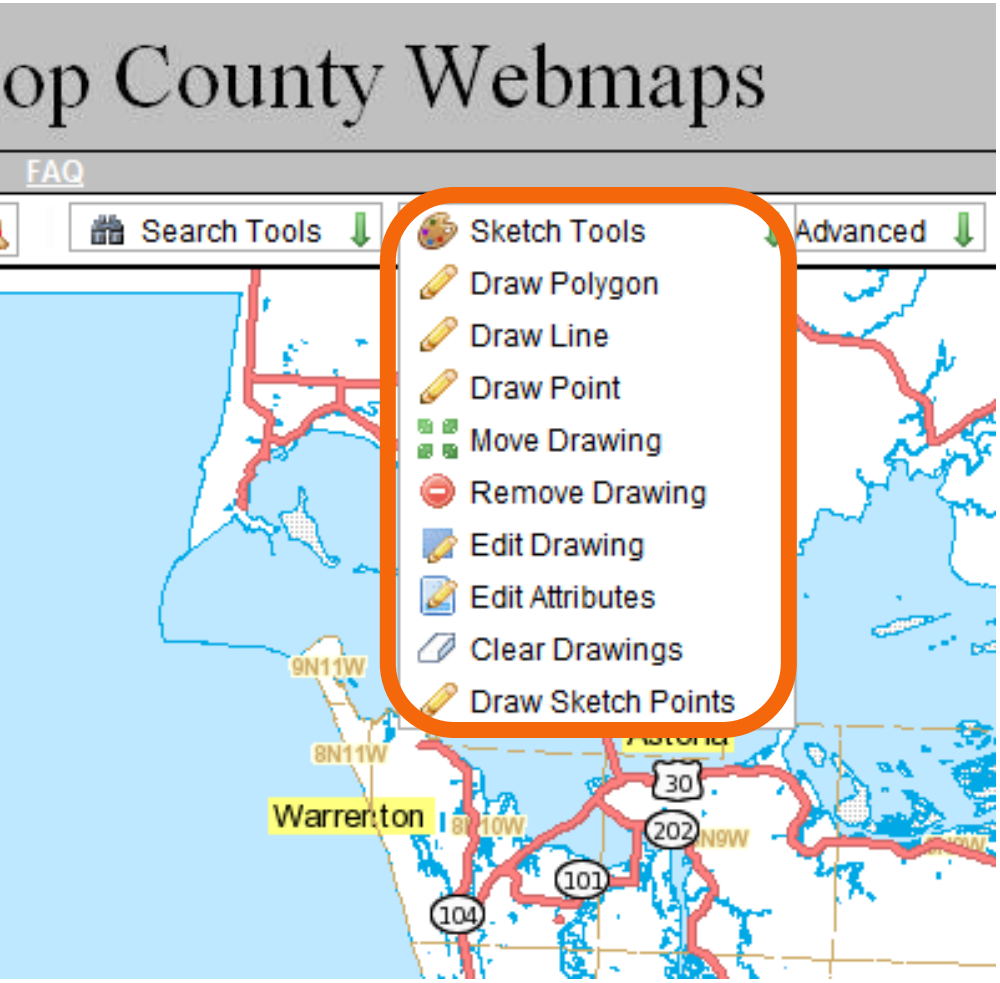
Step 4-5 of 5



1. Use the Select Survey tool to click and draw a box, point, line, or polygon around the area you want to find Surveys (selection area is shown by orange box on map)

2. Click the Survey Image link in Results Tab on the right

Label & Sketch Tools



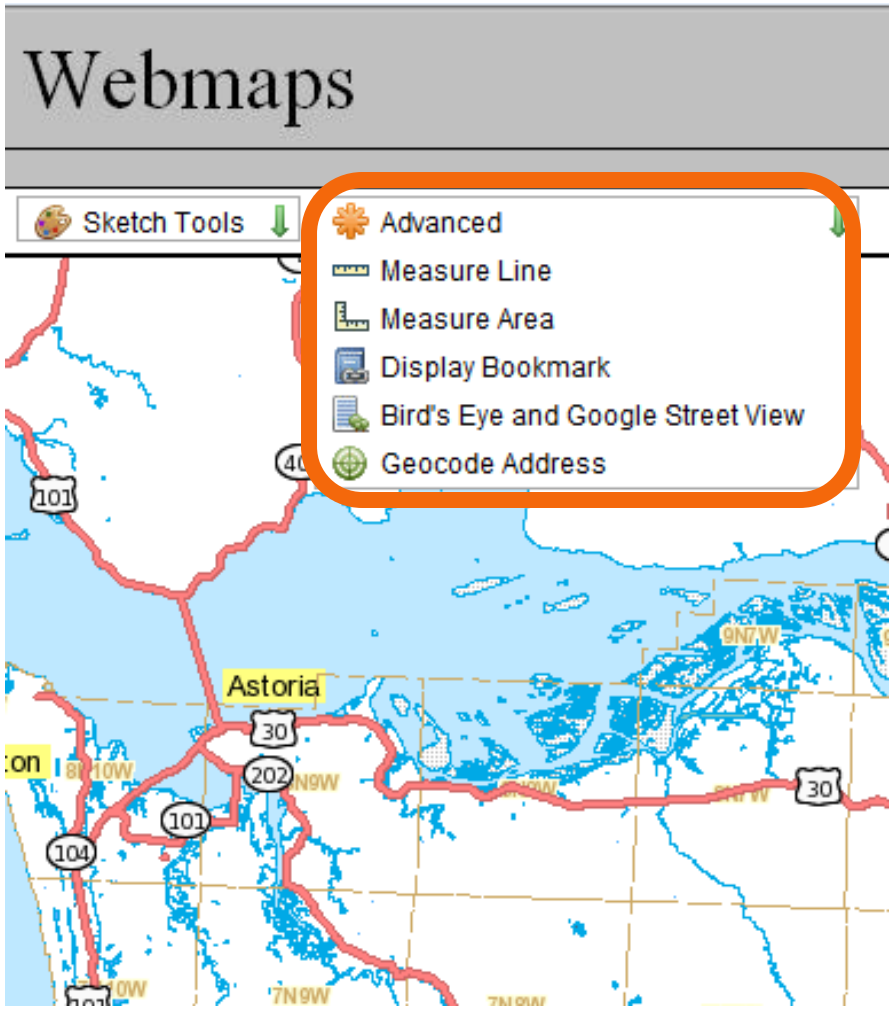
Sketch Tools:

1. Open the **Sketch Tools** dropdown on the main toolbar
2. Select **Draw Polygon**, **Line**, or **Point**
3. Click on map to create sketch
4. Edit sketch by selecting the **Edit Drawing**, and then clicking on the sketch to make changes
5. To remove the sketch, select **Remove Drawing**, and then click on the drawing you want to remove

Label Tools:

1. To add text to the map, first draw a polygon, line, or point sketch, and then select the **Edit Attributes** and click on the sketch
2. A pop-up box will open, allowing you add a label and edit the sketch attributes

Measure, Bookmark, Google Street View Tools



Measure:

1. Click on the Measure Line or Measure Area tool
2. Click once on the map to start measuring
3. Move mouse and click again to continue measuring
4. Double click to stop measuring

Display Bookmark

1. Click Display Bookmark tool
2. Copy/Paste the URL on the right and enter it into a browser address bar, or send it as a link to someone via email

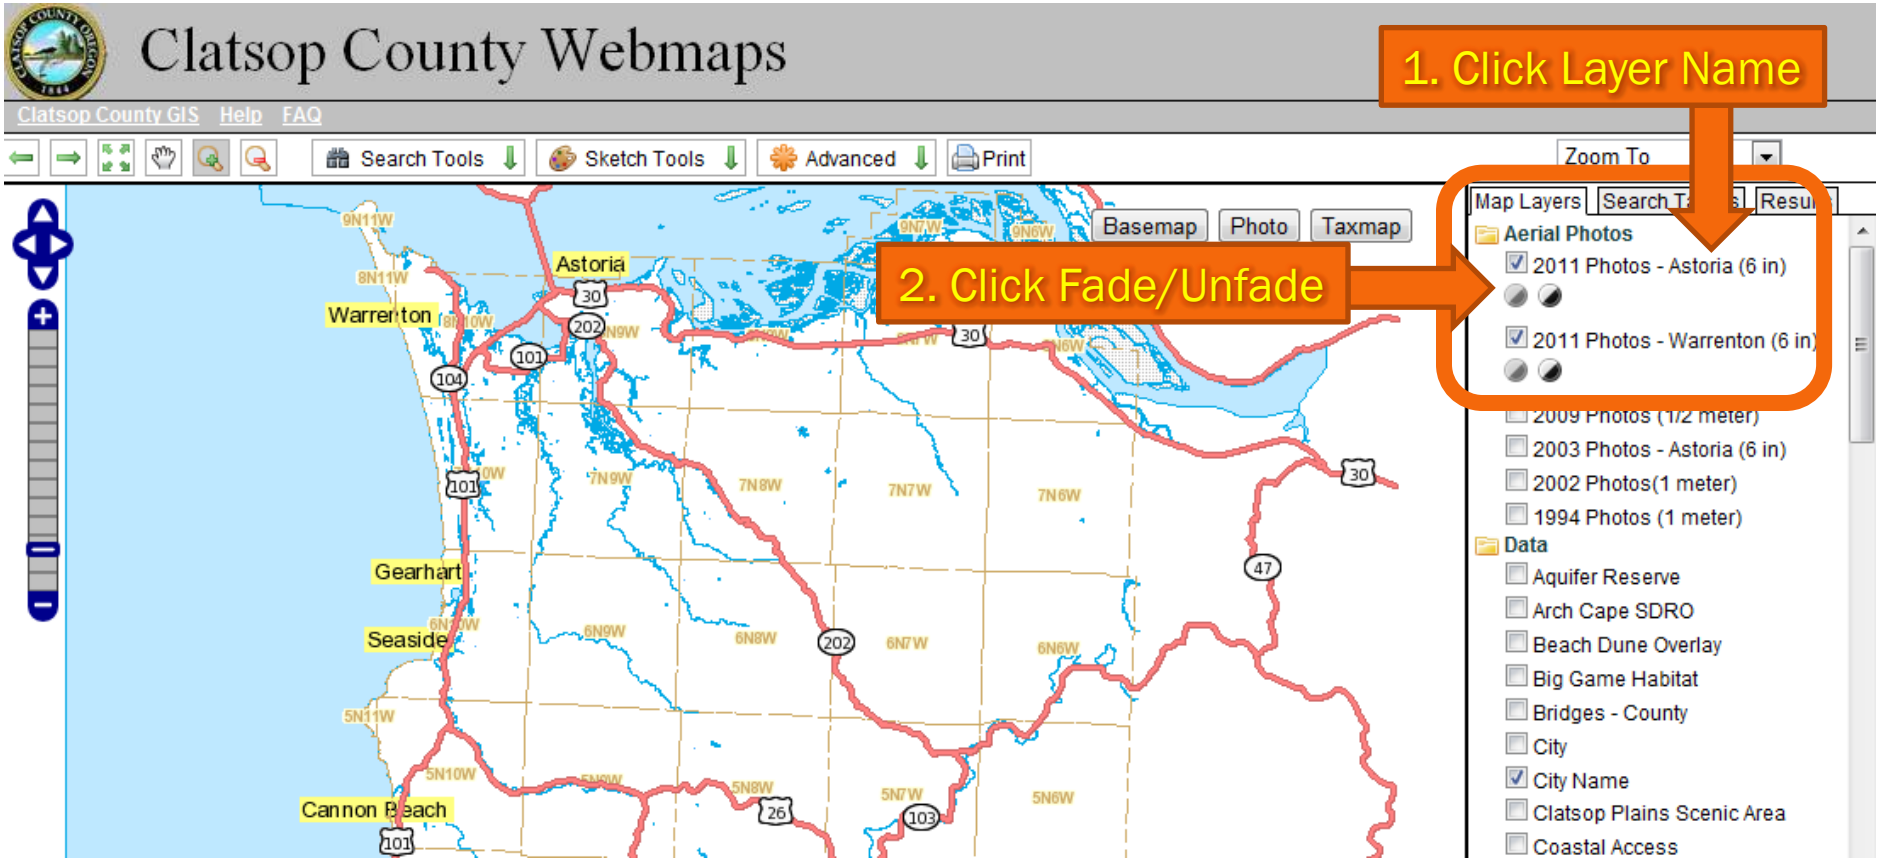
To open current map location in Google Street View:

1. Click on Bird's Eye and Google Street View tool
2. Click on a road on the map
3. Pop-up browser will open showing Google Map
    1. Make sure you have pop-ups enabled in your Internet tools

Geocode Address

1. Allows you to search for a location using Google's Geocoder. For example "Astoria Column".

How to Fade Layers



How to Create Mailing Labels

Step 1 of 6
